Price \$7,500.00 USD

Installation view

Jackrabbit Studio was founded in 2018 by self taught furniture designer Brett Miller. Miller's work draws heavily on simple, functional forms generally inspired by architecture, abstract shapes and suggestions of movement that lend themselves to tactile interaction. Miller's goal is to create unique pieces that are intuitive, curious, and that push the natural boundaries of a given material and one's perception of what is and what should be.
