Artist Statement

After a supernatural experience at the Teotihuacan pyramids, my spiritual journey began; awakening my creative practice. My intention, energy, and spirit are interjected into my painting, murals, and animations. Coming alive through the colors and flows. Intertwining with the world's energy and spirit. Nevertheless, my work is a limited interpretation of spirituality for it is to be experienced personally, to be felt.

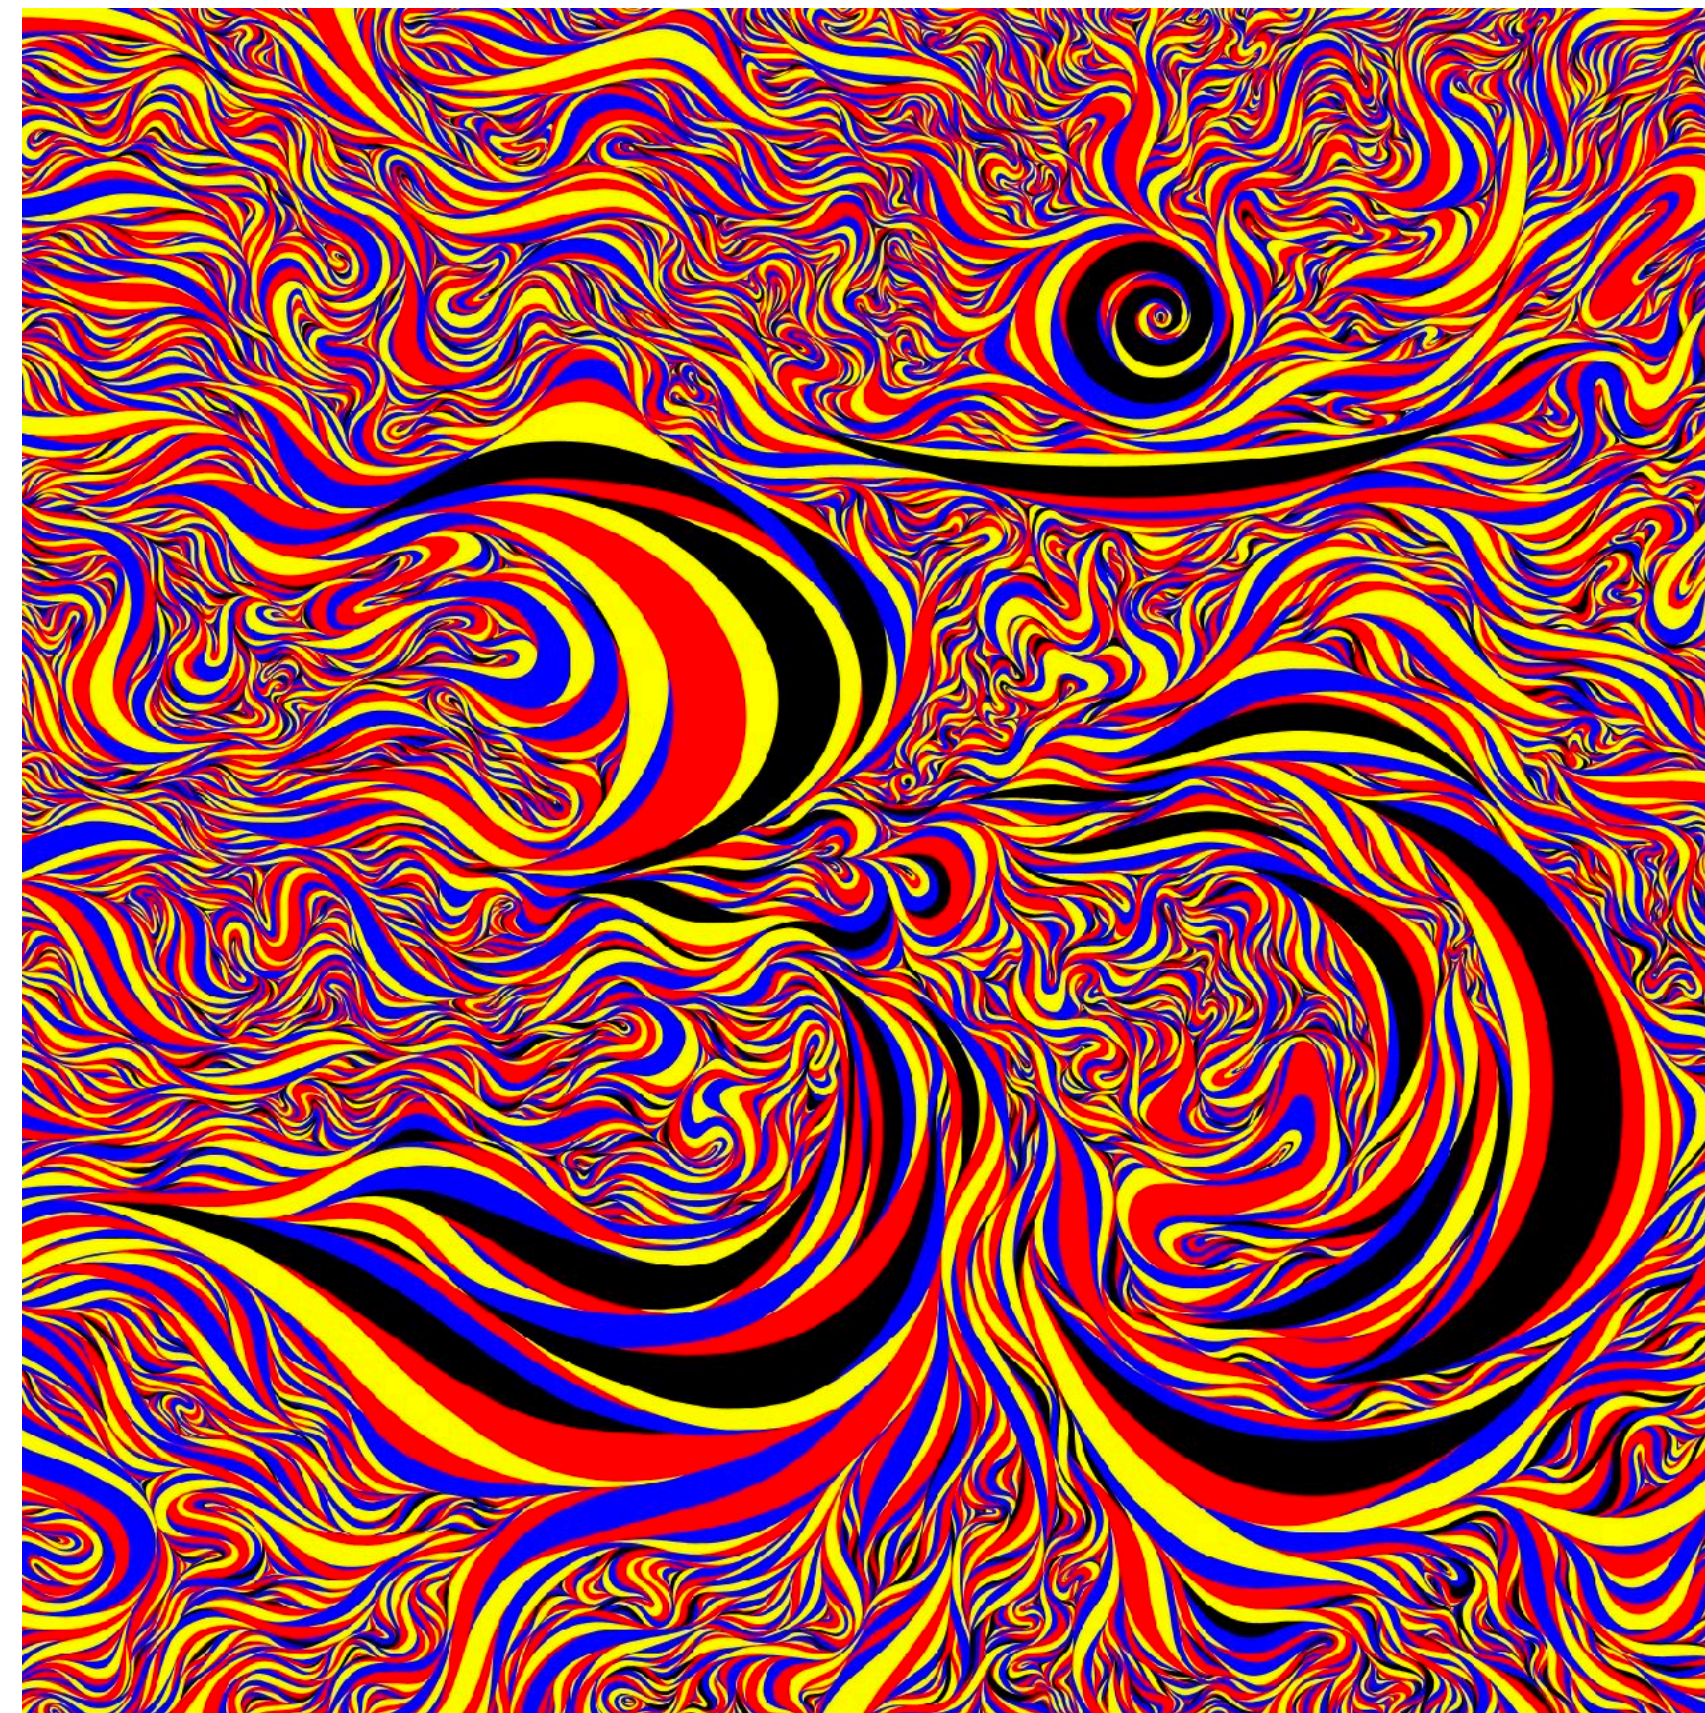

Our world's contemporary lifestyle has neglected spirituality into the absolutes of aspirations, comfort zones and status. While people's inner turmoil caused by modern turbulence intensifies - seesawing between desires and fears. The general population is unable to be at peace, to be content, or to be present. Their spirit remains malnourished and fragile because they are disconnected from it. My work serves as a humble beacon to reignite people's personal belief systems. Belief in spirit and its power to transcend cultural conditions and move through the turbulence of life peacefully, optimistically, and fearlessly.

Sound Healing & Meditation

Started in 2024, Sound Healing and Meditation is a monthly spiritual art event to help people unwind and let go of the tension we consciously and unconsciously hold onto.

The event consists of meditative animation, smoke cleansing, light stretches, guided meditation, and a sound experience.

It's a collaborative event made possible by Don Batalla, Joy Jones, Kinida, Andy le Max, Mary Katlyn O'Malley, and Fung.
