About

Vinest is an Edmonton-owned and operated boutique furniture and home accessory retailer. Our intimate showroom presents a unique variety of high quality home furnishing. We showcase the most innovative and forward thinking designers in Canada.

We source product that is made with local materials and often inspired by the natural world. Many of our products are made with sensitivity to the environment. Our wood furniture, comprises individually handcrafted tables and chairs, guaranteeing you will have a unique piece for your home. It usually will take eight to ten weeks for an order to be filled, unless you buy off the floor.

Our furniture designs can appear simple, but are sophisticated in construction. Our rigid forms remain delicate, through studied variation in material thickness, cantilevered construction, recesses and just-right proportionality. Our high quality handcrafted pieces are beautiful enough to stand alone but are also timelessly adaptable to a range of decor styles, ensuring longevity in an increasingly disposable culture.

Solid wood is the medium of choice at Vinest. Wood is durable and workable, but more importantly it ages gracefully. Each Vinest piece starts life unique in appearance, but further develops a characteristic patina when loved by generations of users.

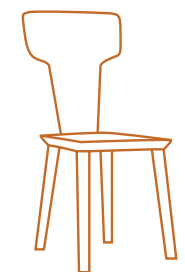

Kitchen & Dining

Comfort and convenience focused furniture for kitchen and dining settings. Vinest has a collection of its most popular models of kitchen and dining furniture that can be quick ordered, made in the standard form from a material of your choice.

Woods & Stains

We source product that is made with local materials and often inspired by the natural world. Many of our products are made with sensitivity to the environment. Our wood furniture, comprises individually handcrafted tables and chairs, guaranteeing you will have a unique piece for your home. It usually will take eight to ten weeks for an order to be filled, unless you buy off the floor.

Our furniture designs can appear simple, but are sophisticated in construction. Our rigid forms remain delicate, through studied variation in material thickness, cantilevered construction, recesses and just-right proportionality. Our high quality handcrafted pieces are beautiful enough to stand alone but are also timelessly adaptable to a range of decor styles, ensuring longevity in an increasingly disposable culture.

Solid wood is the medium of choice at Vinest. Wood is durable and workable, but more importantly it ages gracefully. Each Vinest piece starts life unique in appearance, but further develops a characteristic patina when loved by generations of users.

The listed stains are available on any order, while the results might slightly vary depending on the materials used. The versatile selection of stain colours ensures that you will get the perfect piece that will fit perfectly into the colourscheme of the designated

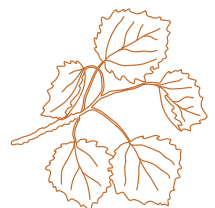

Alder

On average this species tends to be knottier than other hardwoods. It has good nailing and gluing properties, finishes well and it is moderately light in weight. It has a medium density, low stiffness, low bending strength and low shock resistance. Grain is generally straight, with a moderately fine, uniform texture. The wood is rather soft, and care must be taken to avoid denting it in some applications.

Ash

Has a medium to coarse texture. The grain is almost always straight and regular, sometimes curly or figured boards can be found. Produces good results with hand or machine tools. Responds well to steam bending. Glues, stains, and finishes well. Among the least expensive utility hardwoods available domestically. Relatively light weight, very strong with excellent shock absorbency.

Aspen

Grain is generally straight, with a uniform medium texture. Low natural luster. Does not split easily, and has poor nail-holding capability. Wood has a tendency to warp and distort during drying. Glues and finishes well. Aspen is commonly harvested as lumber, and is used for pulpwood in paper manufacture. Wide planks of Aspen lumber should be available within its natural range for a modest price.

Birch

Moderately hard and heavy with moderate shock resistance, stiffness and bending strength. Poor dimensional stability. There is no color distinction between annual growth rings, giving Birch a somewhat dull, uniform appearance. Grain is generally straight or slightly wavy. Fine, even texture, and low natural luster. Generally easy to work with hand and machine tools. Turns, glues, and finishes well.

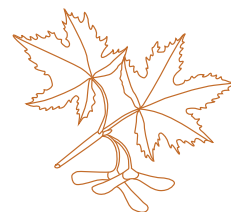

Cedar

Weather resistant and highly resistant to decay, ideally suited for exterior applications where durability and dimensional stability are required. Grain is usually straight, sometimes wavy, with a uniform medium to fine texture. Easy to work with both hand or machine tools, it can dent, scratch and sand unevenly due to its softness. Holds paint well. Stains, glues, and finishes well.

Fir

Earlywood and latewood have a pronounced difference in colour, the latewood having darker, more sharply defined bands. This colour difference results in a distinctive grain pattern when flat-sawn. Grain is generally straight, or slightly wavy. Medium to coarse texture, with moderate natural luster. Typically machines well, but has a moderate blunting effect on cutters. Accepts stains, glues, and finishes well.

Maple

Close fine, uniform texture is generally straight grained but known to have some figures. Fairly easy to work with both hand and machine tools. Maple has a tendency to burn when being machined with high-speed cutters such as in a router. Turns, glues, and finishes well, though blotches can occur when staining, and a pre-conditioner, gel stain, or toner may be necessary to get an even color.

Oak

Mostly straight grained with a medium to coarse texture. Produces good results with hand and machine tools. Has moderately high shrinkage values, resulting in mediocre dimensional stability, especially in flatsawn boards. Can react with iron (particularly when wet) and cause staining and discoloration. Responds well to steam-bending. Glues, stains, and finishes well.

Pine

Grain is straight with an even, medium texture. Heartwood is a light brown, sometimes with a slightly reddish hue, sapwood is a pale yellow to nearly white. Color tends to darken with age. Easy to work with both hand and machine tools. Glues and finishes well.

Tamarack

Grain is generally straight or spiraled. Texture is medium to fine with a greasy or oily feel. Knots are common, but often small. Most hand and machine operations produce good results. High in silica content and will blunt cutting edges. The disparity between the soft earlywood and the hard latewood, sanding can create dips and uneven surfaces. Ranks high in strength, hardness and shock resistance.

Warm White

Off-white stain that creates a clean, yet warm feeling piece of furniture. Works especially well for pieces that will be placed in a nautical themed spaces. Using a lighter colour stain on a naturally dark wood can create an interesting result, with the surface looking lighter while the natural colour of the darker wood shows slightly through, creating a sense of tridimensionalism into the colour.

Caramel Stripe

Off-white background with stripes of caramel. Stain that creates memorable statement pieces. Works especially well for pieces that will be placed in a rustic themed spaces. The caramel stripes create an interesting result, with every stripe being unique in length, width and depth of the colour. Lighter stain allows for the wood grain and knots to show well.

Sandy Beach

Natural looking light beige stain, with yellow undertone. This stain creates natural, light looking wood pieces. Works well with most themes and in most spaces. Easy to combine with any colour. Creates a sense of warmth due to its natural shade. Allows for the wood grain and knots to show well.

Soft Bark

Dark natural beige stain, with greyish-yellow undertone. This stain creates natural, light looking wood pieces. Works well with most themes and in most spaces. Easy to combine with any colour. Creates a slight sense of warmth due to its natural shade. Lighter stain allows for the wood grain and knots to show well.

Barn Doors

Grey washed stain. This stain creates muted looking wood pieces. Works especially well for pieces that will be placed in a rustic themed spaces. Stain is light enough to allow for some of the wood grain and knots to show through.

Rustic Lodge

Striped rustic stain that creates an old style and rough feel. Works especially well for pieces that will be placed in a raw wood or old western themed spaces. The stripes create tridimension to the stain colour. This darker tone stain barely allows for the wood grain and knots to show through.

Soft Driftwood

Uniform rustic stain that creates an old style and soft feel. Works especially well for pieces that will be placed in a raw wood or reclaimed wood themed spaces. The deep, rich tone creates bold look for the stain colour. This darker tone stain allows for very little to none of the wood grain and knots to show through.

Cowboy Country

Washed brown stain that creates a warm feel. This stain creates natural, medium toned looking wood pieces with grey undertone. Works well with most themes and in most spaces. Easy to combine with any colour. Creates a sense of warmth due to its natural looking shade. Medium tone allows the wood grain and knots to moderately show through the stain.

Crisp Cherry

Washed brown stain with reddish undertone. This stain creates wood pieces with distressed look and warm feeling. Works well with most themes and in most spaces. The deep tone of the stain creates an elegant and bold look. Dark enough stain to hide most of the wood grain and knots.

Sweet Choco

Deep brown stain that creates a bold and mature feel. The darker brown undertone creates depth to the stain, allowing the wood pieces to look different depending on the lighting. Work especially well in mature spaces and elegant themes. Hides most of the wood grain and knots.

Gallery

Furniture and home decor pieces, tailored to your specific needs and wants. The gallery pages showcase some of our past custom order work that was handcrafted to the perfection. Unique fit for their forever homes.

Our high quality handcrafted pieces are beautiful enough to stand alone but are also timelessly adaptable to a range of decor styles, ensuring longevity in an increasingly disposable culture.
