
FOREST CHUMP BIOGRAPHY

Forest Chump is a pianist, singer, and songwriter forging *The Birth of Forest Chump*, a six-volume chronicle of breakdown and rebirth now in motion for 2027 Grammy consideration. In 2025, someone he trusted deleted his entire digital presence — years of music, videos, and history — erasing him from the internet overnight. Living with schizoaffective disorder and stripped of everything he'd built, he started over with nothing but a piano, a voice, and the will to keep going. Blending blues, country, folk, jazz, and classical, Forest Chump crafts raw, Southern Gothic narratives that turn personal ruin into art — proving you can burn it all down and still rise louder.
