

Hirsutism Treatment By Spa Life Sanctuary

Hirsutism is a symptom of medical disorders associated with hormones called androgens that cause excessive hair growth in a male-like pattern in women. Women can experience coarse, dark hair that may appear on the face, chest, abdomen, back, upper arms, or upper legs.

Spa Life Sanctuary has a custom treatment program using high-quality natural products to help you achieve*:

- Prolonged periods between hair removal treatment
- Less hair growth- both dark coarse hairs and lighter thin hairs
- Less intense hair removal when need
- Smoother, softer skin texture
- Reduced hyperpigmentation-
- lighter, more even skin tone
- ...a delightful boost in self-image and esteem!
