The Virtue of Quartz

Quartz is one of nature's strongest minerals. Resistant to stains, scratches, cracks, heat and cold and requires minimal maintenance.

Caesarstone surfaces, consisting of up to 93% quartz, retain the cool, tactile qualities of nature's strongest stones while offering freedom of design with seemingly endless application possibilities.

Caesarstone pioneered the original quartz surface in 1987. Since then, we have developed a diverse selection of successful products. Our surfaces come from our state-of-the-art manufacturing facilities, utilizing the most advanced technologies available.

Edge Profiles

The unique properties and durability of Caesarstone quartz surfaces allow for a wide range of edge-profile design options. Many edge profiles are possible, from a standard edge to laminated or mitered edges which create the appearance of a thicker slab. All edge details should have a minimum 1/8" radius on any profile, for both top and bottom edges. For high-traffic areas, 1/4" minimum radius is suggested.

Caesarstone Slab ID

The underside of every Caesarstone slab is uniquely stamped with identification information establishing authenticity.

Wall Applications

Non-porous, waterproof, mold and mildew resistant, Caesarstone quartz surfaces are ideal for kitchen backsplash and bathroom wall linings. Large slabs provide a sleek and modern aesthetic, minimizing seams and maintenance.
