

Tim & Kay Dyk

Mission Aviation Fellowship

Tim and Kay Dyk have been missionaries with Mission Aviation Fellowship for over 33 years. They have been based at the MAF headquarters (now located in Nampa, Idaho) since they returned in 1988 from their first term in Kinshasa, Zaire (now known as Democratic Republic of Congo).

Tim is a pilot/mechanic, but he has spent his entire career with MAF working in the much needed field of “Avionics” (aircraft navigation and electrical systems) as well as ground radio communications support for other mission groups.

Since 1992, Tim has been the Avionics Manager. Besides installing and maintaining the electronics of all aircraft owned by MAF, he also oversees the acceptance, training, and orientation of new avionics and radio technicians. His assistance is provided to all of the programs around the world, and he declares that he believes that he has worked on EVERY airplane that MAF owns and operates!

Besides all the technical work, much of his time is now spent in paperwork--getting approvals, drawings, and certifications needed from the FAA and other foreign civil aviation authorities. He normally travels to the different MAF locations at least 3 times a year.

Kay works as MAF’s Front Desk Receptionist. They also enjoy keeping in touch with their three adult sons and their families.
