"Let your light so shine before men, that they may see your good works, and glorify your father which is in heaven." Matthew 5.16

Terry and Laurie were married in 2005 and have 5 adult children in their blended family. Laurie grew up being a Lutheran minister's daughter and received Christ into her life very young. Terry received Christ at a young age but strayed from Him for many years. In 1997 Terry reestablished his relationship with Christ and has been pursuing Him since.

Laurie is a nurse and Terry is an emergency medical technician. Shortly after they started dating Laurie invited Terry on a short term medical mission trip to Mexico. This trip was followed by 4 more trips to Mexico as well as trips to Guatemala and Honduras. Terry retired from GE Aircraft Engine and is a certified A&P mechanic with Inspection Authorization privileges. In 2009 they responded to the Lord's call to serve in the ministry of mission aviation full time and began service with MMS Aviation, Coshocton, Ohio, in March of 2010.

At MMS Terry serves as a Supervisor for the mission. Laurie is using the skills gained while obtaining a Masters of Ministry degree from Cincinnati Christian University to co-lead a development \ preparation program for the wives' of the apprentices being trained at MMS. While Terry is helping prepare the apprentices to become mechanics, Laurie is helping prepare their wives for service wherever they might be called.

Before relocating to Coshocton, Terry and Laurie attended the Vineyard Community Church in Springdale, Ohio, a northern suburb of Cincinnati. While attending the Vineyard they lead a small group for married couples in their home and were on the church's mission committee. Terry was a member of the church team that brought clean water to the people of Jos Nigeria and Laurie was on the mission leadership development team. In Coshocton they are attending and involved with New Pointe Community Church, a relatively recent church plant. Laurie is involved with the hospitality team, Terry helps with facilities, and together they actively participate in a small group.
