Core Competenices

Sankofa Media Group is an “in-house” photography, video and music editing outfit. After the shoot, every aspect of your project can be completed by our team in one central location.

Competenices include expert knowledge of the most advanced editing softwares and equipment. I invest in my team with by staying current in the latest available applications.

This involves comprehensive training and equipment upgrades.

Professional, courteous service and attention to our customer’s needs makes us a world-class organization.

Differentiators

“**Results, Not Excuses.**” While we are highly skilled in the arts of photography, video and music scoring; we do not stop there. To help support my clients I hold TWIC as well as critical certifications and license to safely perform aerial video and photography. A practice we will continue as new advances enter the market.

Your finished project/package can be delivered several ways depending on your needs and the type of assignment. You never have to worry about the deadline.
