

SI Buddy[®] Program

An iFuse Patient Networking Resource

"The SI Buddy program allows me to share my iFuse experience with others."

—SI Buddy Leigh

iFuse
procedure
performed
Sept. 2008.

SI-BONE[®] | **iFuse** Implant System[®]
Minimally Invasive Sacroiliac Joint Surgery

How the SI Buddy program works

The SI Buddy[®] program is an iFuse patient networking resource, available through the SI BONE's SI Joint Patient Community[®] (SIJPC).

If you are a patient recommended for the iFuse ProcedureSM by a trained surgeon, the SI Buddy program is designed for you. SI Buddy participants are not medical or clinical professionals, they are patients who underwent the iFuse Procedure and volunteer their time to share their iFuse experience with others. If you are interested in speaking with an SI Buddy or hearing about their journey, please visit:

www.sijpc.org

or call toll free at

844-742-8339

**SI Joint Patient
Community[®]**

SI Buddies are not paid. Those who participate in SI-BONE, Inc. sponsored events are reimbursed for travel expenses.

The iFuse Implant System[®] is intended for sacroiliac fusion for conditions including sacroiliac joint dysfunction that is a direct result of sacroiliac joint disruption and degenerative sacroiliitis. This includes conditions whose symptoms began during pregnancy or in the peripartum period and have persisted postpartum for more than 6 months. Clinical studies have demonstrated that treatment with the iFuse Implant System improved pain, patient function, and quality of life. There are potential risks associated with the iFuse Implant System. It may not be appropriate for all patients and all patients may not benefit. For information about the risks, visit www.si-bone.com/risks
