

Parents/Guardians,

I have noticed over the years that some students struggle with adding and subtracting when regrouping/borrowing is involved. In order to help with that we complete a few problems together each day before we start our Math lesson. Some of the skills in 3rd grade are similar to those learned in 2nd grade. ***Subtraction with Regrouping/Borrowing, and Addition with Carrying*** are two of those skills. The only difference is the amount of numbers. Students in 2nd grade add & subtract up to 99 or less. In 3rd grade students will add or subtract numbers that will not exceed 1,000. The strategies learned in 2nd grade are the same ones used to complete the problems in 3rd grade. The only difference is there are more numbers. We have been working on Addition since the beginning of the school year (I will start on Subtraction soon). There are Subtraction & Addition activity sheets attached for students to work on at home. It's very important that students struggling with this skill get help at home as well as at school. Please use the activity sheets to help your child practice at home & I will keep doing the same at school.

Thank you,

*****Subtraction problems that end in Zeros can be extremely difficult to solve. Students are unsure what each Zero turns into when Regrouping/Borrowing. Use the following strategy to help make these types of problems easier.**

1,000 (Subtract 1 from 1,000) □ 999

-674 (Subtract 1 from 674) □ -673
326

*****IF YOU SUBTRACT 1 FROM THE TOP #
YOU HAVE TO SUBTRACT 1 FROM THE BOTTOM #!!!!*****

2 Digit Addition Without Regrouping (Use the number line to help you.)

$$\begin{array}{r} 1. \quad 89 \\ + 10 \\ \hline \end{array}$$
