

# **Known Typing Issue with the Chrome Browser and V2 Cloud**

01/01/2024

## **Issue:**

You are not able to type in any program inside the V2 Cloud Platform while using the Google Chrome Browser to access the V2 Cloud Platform.

## **Workaround:**

(V2's Statement)

*"While we strive to resolve the issue promptly, we've identified a temporary workaround to address this conflict."*

**Step 1:** On your Chrome browser, open a new tab and navigate to

<chrome://flags/#origin-agent-cluster-default>

**Step 2:** Look for "Origin-keyed Agent Clusters by default" and set this option to "Disabled".
