- **Network** and **Back up Data** easily
- No **Customer Caps** or **Restrictions**
- Great **Tutorial Videos** and **Support**

We are the leaders in software designed specifically for Environmental Health. If you are a company looking for a great way to track your customers and manage your daily operations, the SAFE Program is the one for you.

SAFE was introduced 23 years ago by my father and myself. The program has grown to what it is today because we listen to what you want and stand behind it 100%. If you ever need assistance, we are only a phone call away!

SAFE is a PC-based program that is installed on your computer(s) and works great in an office network environment. However, if you need more mobility but don't want to pay a high price to convert to a web-based platform, we have recently introduced a **CLOUD Platform** that will allow you and your team to access SAFE and other programs from any device and location using internet or cell service.

PLEASE VIEW THE BACK OF THIS BROCHURE TO HELP YOU DECIDE WHAT PLATFORM IS RIGHT FOR YOUR COMPANY OR ORGANIZATION

WHICH PLATFORM IS BEST FOR ME?

Factor	PC-Based	Web-Based
💰	Necessary **budget** for implementation	**Cyclical payment** for the service
🔒	Security on the **client-side**	Security provided by the **vendor**
🖥️	**Offline** access possible	**Online** access from anywhere
⏳	Usually **longer** implementation	**Fast** implementation
🎛️	**Unlimited** customization options	**Little** customization options
⚙️	Maintaining infrastructure on the **client's** side	Maintaining infrastructure on the **vendor's** side
☁️	**Great** control over the system	**Partial loss** of control over the system

BitBag

THE BEST OF BOTH WORLDS!

As stated, SAFE Software is a PC-Based software package. If you would like to give your service technicians LIVE ACCESS to the data in the field, look no further. We can transition your program to a Cloud environment which would…

- Reduce Paperwork
- Increase Productivity
- Lower Operating Costs
- Reduce Drive Time
