## COMPANY OVERVIEW

Hive International, LLC is a Virginia-based consulting firm founded in 2016 by national security, criminal justice, and foreign policy professionals. We specialize in designing, implementing, and evaluating foreign technical assistance programs that strengthen international law enforcement, advance the rule of law, and promote global stability in alignment with U.S. Government priorities.

Hive serves as a trusted small business partner to the U.S. Department of State and other federal clients in delivering strategic security cooperation initiatives. Our advisory teams support mission-critical programs that combat transnational organized crime, enhance investigative and prosecutorial capabilities, and build institutional resilience across partner nations. With operations spanning the Caribbean, Central America, and beyond, Hive brings deep regional fluency and a track record of performance in complex, high-threat environments.

### TASK FORCE INVESTIGATIONS & OPERATIONS SUPPORT

Hive deploys veteran law enforcement advisors to support regional task forces on high-priority transnational organized crime (TOC) cases. Our teams provide operational guidance, daily mentorship, and case-based training to strengthen investigative capacity and foster multi-agency collaboration.

In the Eastern Caribbean, Hive supports the RSS Task Force through:

- **Active case support** on firearms, narcotics, human smuggling, and homicide investigations
- Facilitation of **cross-border intelligence sharing** and secure partner coordination
- **FBI CAST integration** for cell tower mapping and digital evidence analysis
- **Scenario design and operational planning** for SOUTHCOM's Tradewinds and other joint exercises
- **Mentorship** in intelligence-led, evidence-based policing models

Hive helps shift partner agencies from reactive enforcement to proactive disruption of TOC networks, advancing regional stability and U.S. security objectives.

### DIGITAL FORENSICS & CYBER ADVISORY SERVICES

Hive is a recognized leader in digital forensics capacity building for law enforcement, military, and judicial stakeholders. We deliver end-to-end support for mobile and computer forensics programs, integrating strategic advisory services, lab development, toolkits, and expert-led training.

Key capabilities include:

- **Implementation and advisory support** to labs such as RSSDFL (Eastern Caribbean) and INACIF (Guatemala)
- **Indexed data repositories** (IDRs) for high-volume artifact processing and cross-case correlation
- **SOPs, accreditation, and courtroom readiness** training for prosecutors and forensic staff
- **Mentorship on international standards** and evidence handling from seizure to trial
- **Scalable transformation** of labs into regional centers of excellence

Hive's industry-leading experts enable partners to disrupt organized crime and achieve successful prosecutions through high-integrity digital evidence.

## BORDER SECURITY & INTELLIGENCE

Hive delivers expert advisory services to regional customs and border security agencies, focusing on operationalizing tools and frameworks that enhance interdiction, targeting, and data governance across the region.

- Strategic support to Caribbean Community (CARICOM) Implementation Agency for Crime & Security (IMPACS) and its Joint Regional Communications Centre (JRCC), **enhancing awareness of maritime, cargo, and aviation movements**, and advancing the use of platforms like Windward and ACIS for live interdiction targeting
- Mentoring and training for **airport and seaport risk management, targeting methodologies, search/post-search procedures**, and the exploitation of Passenger Name Record (PNR) data
- Policy development assistance, helping JRCC and member states draft and adapt **regional model legislation on PNR use** and data privacy to guide national implementation

Hive empowers regional authorities with repeatable enforcement models, interoperable tools, and tailored policies to detect, disrupt, and respond to transnational threats.

## PROGRAM MANAGEMENT & LOGISTICS

Hive's Program Management Office (PMO) provides coordinated operational, administrative, and technical support across all active Hive projects and client portfolios. **Our PMP-certified team brings decades of experience** managing U.S. Government-funded criminal justice, security, and foreign assistance programs across dynamic international environments.

We leverage leading project management platforms—such as ClickUp, Canva, SharePoint, and PowerBI—to provide **real-time visibility, performance tracking, and integrated reporting** to our clients and field teams. Hive's PMO structure allows us to manage multiple concurrent contracts with precision, while reducing overhead and increasing responsiveness to evolving mission needs.

## TRAINING DEVELOPMENT & DELIVERY

Hive develops and delivers competency-based training tailored to each partner nation's operational, legal, and cultural context. Our team applies modern instructional design (ISD) methods to strengthen law enforcement, border security, customs, prosecution, and judicial institutions. Our training program portfolio includes:

- **More than a dozen high-impact training packages** for INL and the Antiterrorism Assistance (ATA) Program, including:
  - *Digital Forensics for Police Prosecutors*
  - *Ethical Policing and Professional Standards*
  - *Strategic Management in Law Enforcement*
  - *Mobile Device and Open-Source Forensics*
  - *Seaport Interdiction and Maritime Security*
  - *Post-Blast Inspection and Quick Reaction Force*
  - *Task Force Scenario-Based Interagency Response*
- Training for **SOUTHCOM's Tradewinds exercises**, integrating anti-corruption, intelligence sharing, and task force operations
- Localized curriculum for a one-year certification program for **Eastern Caribbean police prosecutors**

Hive ensures all course content is outcome-driven, scenario-tested, and aligned with U.S. foreign assistance and rule of law objectives.

## MONITORING, EVALUATION & PUBLIC DIPLOMACY

Hive is a recognized leader in monitoring, evaluation, and public diplomacy for national security, law enforcement, and foreign assistance programs. We design actionable M&E frameworks aligned with U.S. Government standards—using logic models, change maps, disaggregated metrics, and lifecycle outcome tracking to drive accountability and data-informed decision-making. As one of the first implementers of the Department's DevResults platform, Hive supported its pilot rollout in the Eastern Caribbean and trained regional partners in system integration. The Department of State **nominated Hive for the Department's Data for Diplomacy Award** for identifying border security gaps through digital tools and guiding strategic reforms.

In parallel, Hive designs and manages alumni engagement programs that extend the impact of justice sector capacity building beyond the classroom. We led the development of the ILEA Roswell Alumni Program, **supporting thousands of law enforcement professionals from 70+ countries**, and helped launch INL Bridgetown's Eastern Caribbean Alumni Working Group to formalize interagency collaboration. Our approach integrates M&E tools, digital outreach, and event facilitation to sustain reform momentum, track alumni-led change, and strengthen regional networks that advance long-term U.S. foreign assistance goals.

## PAST PERFORMANCE

- Dept. of State, International Narcotics & Law Enforcement Affairs (INL) - *Regional Security System (RSS) Digital Forensics Lab (RSSDFL)*
- Dept. of State, INL - *RSS Task Force*
- Dept. of State, *International Law Enforcement Academy (ILEA) Roswell*
- Diplomatic Security - *Global Anti-Terrorism Assistance Program*
- Dept. of State, INL - *Guatemala Digital Forensics Center of Excellence*
