Shoreline IT - Cyber Security

In today's digital landscape, protecting your organisation from cyber threats is more critical than ever. Shoreline IT Cyber Security monitoring, altering & reporting service provides a comprehensive, cloud-native solution tailored for Microsoft 365 and SaaS environments.

How **Shoreline IT** protects you

Centralised Cyber Security Management - Gain full visibility across all Microsoft 365 tenants and SaaS apps from a single, multi-tenant platform.

Threat Detection & Response - Instantly detect breaches and remediate automatically or manually with one click, minimising downtime and risk

Security Best Practices in Minutes - Apply Microsoft Secure Score aligned policies in minutes with pre-built or customised templates.
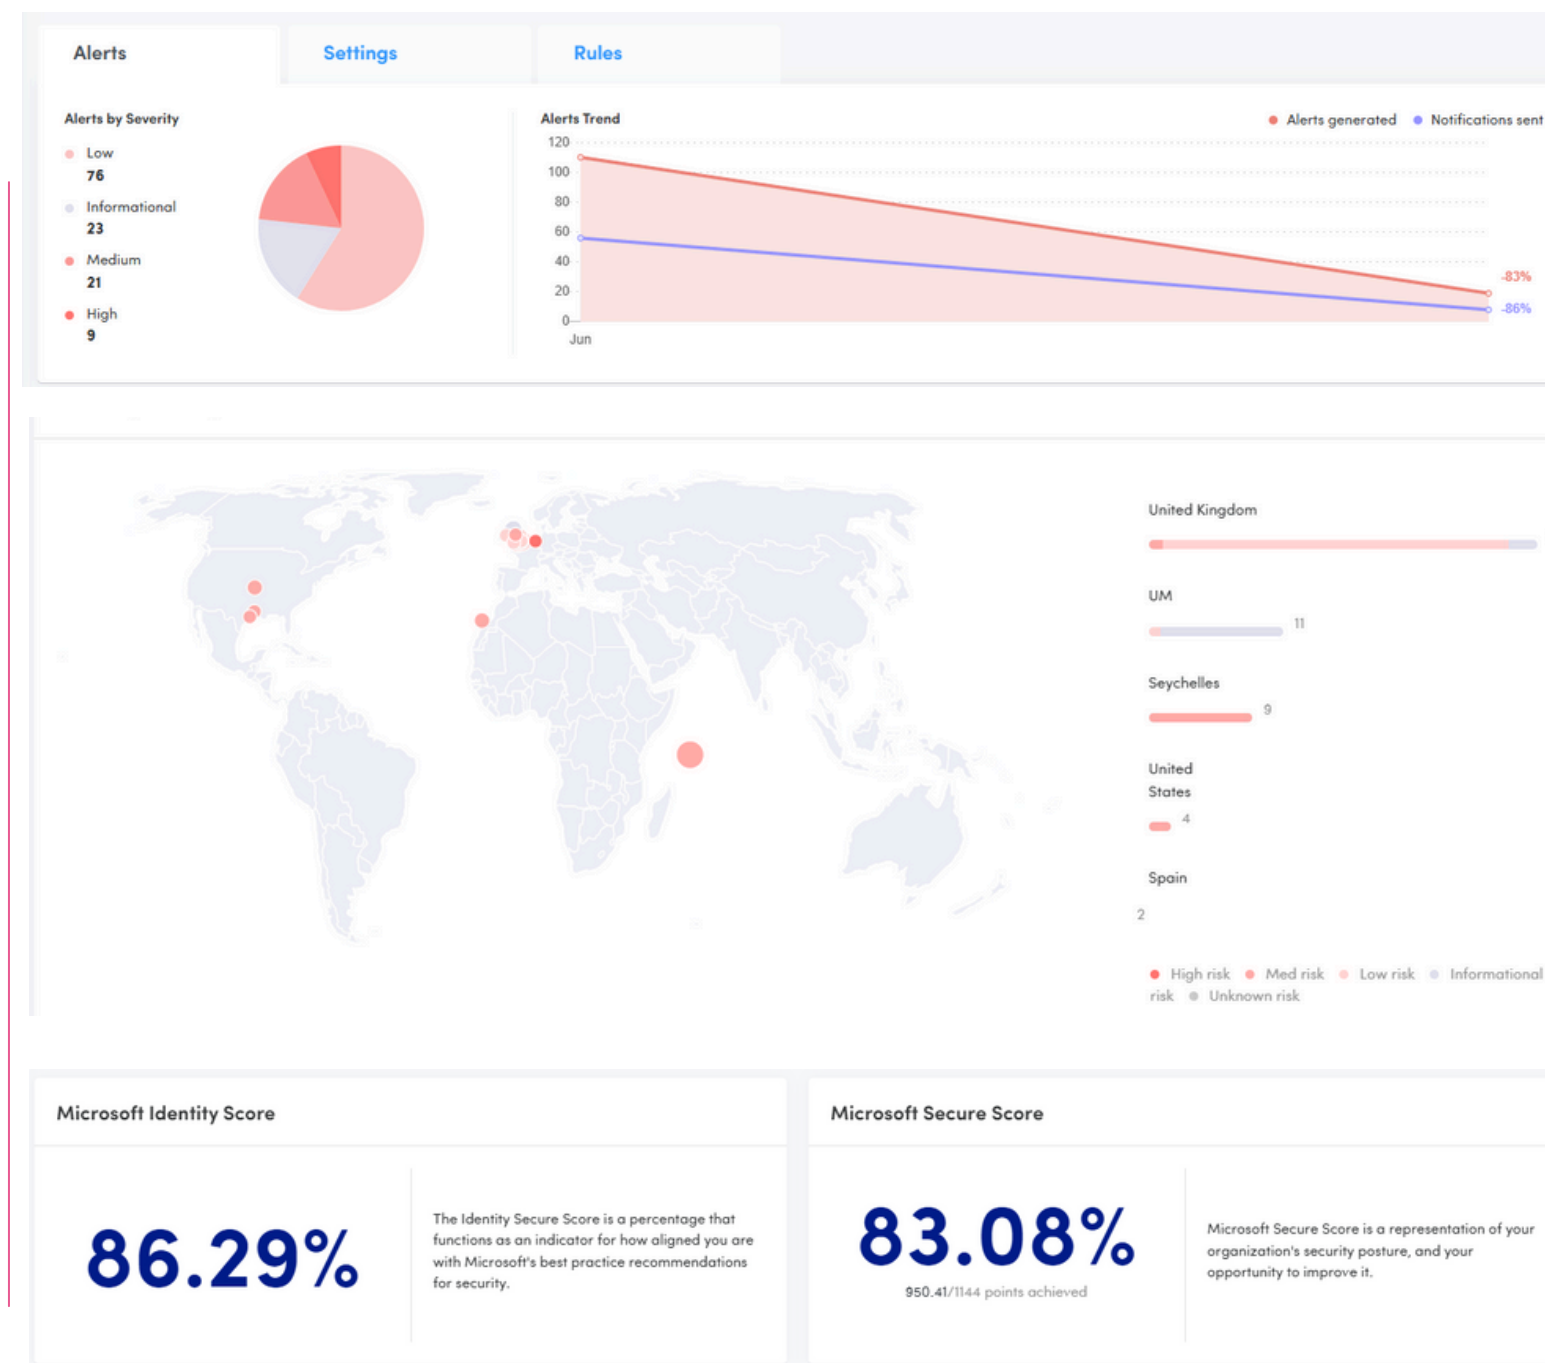

Managed MFA & Policy Enforcement - Monitor and enforce MFA, detect legacy authentication and ensure compliance across all users.

SaaS Application Management - Monitor which applications users are accessing, identify & enforce SSO or MFA per application.

Automated Reporting - Deliver scheduled security reports to stakeholders, saving time and increasing transparency

Key **Benefits**

Full Visibility of alerts, policy drift & security posture

Rapid Threat Response, instantly detect and remediate

Strong Security Compliance aligned with industry standards

Time saving Automation with automated policy enforcement

Automated Scaling with any new user or SaaS app instantly identified
