

Shoreline IT - Cyber Security

Cyber threats are relentless, your protection should be too.

Shoreline IT delivers powerful, cloud-native security monitoring, alerting and reporting built specifically for Microsoft 365 and modern SaaS environments.

How Shoreline IT protects you:

 **Unified Security Oversight** - Complete visibility across all Microsoft 365 tenants and SaaS apps from one central platform.

 **Threat Detection & Response** - Spot threats instantly and remediate automatically or with one click to reduce risk and downtime.

 **Best-Practice Security in Minutes** - Apply Secure Score-aligned policies quickly using pre-built or custom templates.

 **MFA & Policy Enforcement** - Enforce MFA, block legacy authentication and maintain compliance across every user.

 **SaaS Application Management** - Monitor app usage, identify risks and enforce SSO or MFA per application.

 **Automated Reporting** - Deliver scheduled security reports to stakeholders, improving clarity and saving time.

Key Benefits

-  **Instant Visibility** – See alerts, policy drift and overall security posture at a glance.
-  **Fast Threat Response** – Detect and remediate issues immediately.
-  **Stronger Compliance** – Stay aligned with industry-standard security practices.
-  **Automation-Driven Efficiency** – Enforce policies automatically and reduce manual effort.
-  **Effortless Scaling** – New users and SaaS apps are identified and secured automatically.
