

Under Your Skin:

What you don't see can hurt you!

Under Your Skin: What you don't see can hurt you

Under Your Skin: What you don't see can hurt you

There are 7 main functions of the skin. They are:

- *Sensation
- *Heat regulation
- *Absorption
- *Protection
- *Excretion
- *Secretion
- *Vitamin D production

Under Your Skin: What you don't see can hurt you

Under Your Skin: How to Protect Your Skin

NORMAL		CANCEROUS
	"A" IS FOR ASYMMETRY <ul style="list-style-type: none">• If you draw a line through the middle of the mole, the halves of a melanoma won't match in size.	
	"B" IS FOR BORDER <ul style="list-style-type: none">• The edges of an early melanoma tend to be uneven, crusty or notched.	
	"C" IS FOR COLOR <ul style="list-style-type: none">• Healthy moles are uniform in color. A variety of colors, especially white and/or blue, is bad.	
	"D" IS FOR DIAMETER <ul style="list-style-type: none">• Melanomas are usually larger in diameter than a pencil eraser, although they can be smaller.	
	"E" IS FOR EVOLVING <ul style="list-style-type: none">• When a mole changes in size, shape or color, or begins to bleed or scab, this points to danger.	

1. Stay out of the sun!!!
