ABOUT LEEDS PRESS CORP.

-BUSINESS CONSULTING DIVISION-

01

Leeds Press Corp's Business Consulting Division is dedicated to providing versatile and tailored consulting solutions. Our mission is to offer a comprehensive range of consulting services, encompassing management, strategy, finance, IT, marketing, and beyond.

02

As a cohesive team of experts, we work collaboratively to empower organizations of all sizes, including startups, small enterprises, large corporations, government agencies, and non-profit organizations. Our aim is to elevate their performance and bolster their competitiveness within the ever-evolving marketplace.

03

At Leeds Press Corp's Business Consulting Division, we leverage our diverse expertise to offer innovative, client-centric strategies and solutions. Our commitment is to guide our clients through transformative processes, enabling them to thrive and achieve their business objectives with confidence.

OUR BRANDS OF CONSULTANTS

EXPERTISE

Business consultants typically have specialized knowledge and experience in areas such as management, finance, marketing, operations, human resources, or technology. They leverage their expertise to provide insights and solutions to clients.

PERSPECTIVE

Consultants bring an outsider's perspective to the organization, which can be valuable in identifying and addressing issues that may be overlooked by internal teams due to their proximity to the business.

CUSTOM SOLUTIONS

Consultants tailor their services to meet the unique needs and challenges of each client. They assess the current state of the organization, develop customized strategies, and provide recommendations to achieve specific goals.

COMPLEXITY

Consultants are often hired to help solve complex problems or address critical issues within a business. This may include improving efficiency, reducing costs, increasing revenue, or navigating strategic changes.

MANAGEMENT

Consultants assist organizations in implementing changes, whether it's adopting new technologies, restructuring operations, or improving business processes. They often play a crucial role in change management and helping employees adapt to new ways of working.

PROJECT MANAGEMENT

In some cases, consultants are responsible for managing and overseeing specific projects or initiatives on behalf of the client. This includes defining project scopes, timelines, budgets, and deliverables.

TRAINING

Consultants may provide training and development programs to improve the skills and capabilities of a client's employees, ensuring they can execute recommended strategies effectively.

IMPLEMENTATION

While consultants provide recommendations, they may also assist clients in implementing changes, monitoring progress, and adjusting strategies as needed to achieve desired outcomes.

NETWORKING EVENTS+ SEMINARS

Part of a consultant's role is to educate clients about industry best practices, emerging trends, and potential risks, empowering them to make informed decisions. Such in-services and informational will take place on a one-on-one basis, and will require additional registration for WIB networking opportunities, events, mixers and supplemental seminars...only open to our active clients.
