

TRAFFICALM™ FLASHING SIGN SYSTEMS

CONFLICT INTERSECTION WARNING SYSTEM

Attention grabbing LED rings maintain the shape and intent of the highlighted sign, just how the MUTCD requires

TraffiCalm™ components are perfectly designed to address many of the common concerns on our roads. The Conflict Intersection Warning Solution is yet another realization of the system's ability to adapt and resolve many of our road problems

 Live detection produces real-time warning to all drivers, dramatically improving awareness and response time

- 100 ms wireless response time
- 1000' (300m) detection range
- Detection in all weather conditions

 Retrofit installation and off-grid power maximize investment for pervasive implementation, especially in rural areas

- Universal mounting brackets
- No specialized tools required for installation
- Enhance *existing* signs and posts!

 Ruggedized electronics and available extreme climate batteries engineered to provide years of maintenance free service

- Nema 4X Rated Enclosure
- Sealed, maintenance-free batteries
- 5 year limited warranty

Making full use of the ever flexible combination of a Controller, at least one Collaborator, Flashing LED Sign Rings, and TraffiCalm™ Radars, Flashing Sign Systems can create any matrix of detections and flashing outputs

**CROSS TRAFFIC
DOES NOT STOP**

Accounting for 7.1% of all fatal crashes on America's roads¹, failing to yield represents a leading danger to every driver; *even more* than distracted driving. From rural highways to residential streets, elevating driver awareness is the key to improvement for these types of crashes.

Our system designed to provide drivers with real time information based on vehicle detection. No other system provides the lightning fast installation that ours does. Utilizing existing signs and posts, our Conflict Intersection Warning Solution is ready to send a clear message.
