- One button control of zone chiming, and exiting while the alarm is armed.

***Top Security Alarms** can install a state-of-the-art security system which can detect whenever a door or window is opened as well as if the glass shatters. Once inside motion sensors can detect interior movement and send a separate signal notifying the Police that an intruder is inside. Our systems can also monitor for Fire, Carbon Monoxide Gas, Medical Emergencies, Flooding, Freezing, and other non-burglary conditions. All wiring is concealed neatly inside the walls, ceilings, and floors to create a neat and professional look. We offer many different types of contacts and detectors. We carefully select the equipment based on performance, reliability, aesthetics, ease of use, and of course to fit within your budget. The most value for your money is what we offer!*

All our work comes with a complete one year guarantee on all parts and labor excluding damage from abuse, misuse, and neglect. Be assured all our technicians are highly skilled, neat and courteous. Choose Top Security and you are not just buying quality alarm equipment but selecting a company that is professional, reliable, and dependable.
