Vision Treynor Group Purchases Land for Family Recreation Complex

Today, Vision Treynor Group announced it has purchased land for the development of the future Treynor Family Recreation Complex.

According to Travis Castle, president of Vision Treynor Group, the \$600,000 purchase was made with funds from two sources. The majority of the land acquisition was paid for with TS Bank's initial \$500,000 gift in support of the Family Recreation Complex. The remaining funds were provided to Vision Treynor Group on a short term basis via the TS Bank Endowment Fund.

"This is an important and fundamental step forward to ensure this project becomes a reality for our community," said Castle. "We thank TS Bank for its generosity in making the purchase possible, and look forward to great progress for the Treynor Family Recreation Complex in 2013."

The 63-acre parcel of land purchased for the project can be accessed from Highway 92, Main Street in Treynor. The site is just two blocks from the elementary school and one block from the middle school and high school.

When complete, the Treynor Family Recreation Complex will provide a greater level of recreational services and amenities for residents of the Treynor area and central Pottawattamie County, including youth softball, baseball, football and soccer fields, a walking trail, a community fitness center, amphitheatre and a family aquatic center.

Established in February 2010 by a group of interested citizens, Vision Treynor Group's purpose is to serve as a self-sustaining organization that facilitates the success of public and private projects which benefit the economic and social climate of Treynor and its surrounding area. It is a nonprofit, 501 (c) 3 organization.
