OUR PROJECT REFERENCES

OP2 ENGAGEMENTS & EVENTS

Working in so many different locations, Op2 consultants don't often get to meet in person. This quarter, we were thrilled to have had the opportunity to bring our team together from across Australia for 2 days of team building in Brisbane.

The team shared the key knowledge and insights from all their diverse experience, as well as got to know each other better through a series of escape rooms.

OP2 PUBLICATIONS

Ever wondered how Project Management differs in a complex project? We asked Rocky Lee, one of our Project Management consultants about what it's like to be a Project Manager with OP2.

What does your role as an OP2 Project Manager involve?

My role as an OP2 project manager involves playing an active role in assisting our client to ensure on time delivery of vital project milestones and resolve project challenges. Very often OP2 project managers will form part of the client's project team to directly drive results for our client.

What are some of the key lessons you have learnt from being a project manager at OP2?

A key element of success that I have learnt is understanding the importance of building a positive relationship with the project team. While it is important to be able to efficiently follow well established project management processes, success is also achieved with a positive team attitude. The ability to react quickly to problems, sit down and work things out professionally is what can make or break a project.

OP2 SPECIALIST INTRODUCTIONS

This quarter, we are excited to introduce two new consultants to our team, Robert and Phil!

Robert is an experienced and highly driven project control professional, with 15 years of construction planning and scheduling experience in sectors including oil and gas, mining and metals, clean power, and rail. Robert is results focused subject matter expert, with advanced knowledge of dynamic planning & scheduling systems, methodology and philosophies. He has assisted in the successful delivery of large international and domestic construction projects across Australia, Europe and Asia for recognized clients such as Inpex, Alcoa and BHP. These projects include Ichthys LNG Plant, Fjardaal Aluminium Smelter, and Worsley Alumina Refinery Expansion. Robert is passionate about implementing practical and effective project controls which are used by the project teams in order to make better decisions. He does this by integrating people, processes and systems.

Phil brings over 20 years' experience delivering multi-billion-dollar projects in the construction, mining, and infrastructure sectors across Australia, including 10 years in the rail industry.

He has most recently been engaged as a project controls manager and PMO consultant on Metronet Rail projects in WA. Taking a collaborative approach with the project management team, Phil builds and maintains strong client relationships. He has successfully led project controls teams in delivering complex projects on time and within budget. Phil's area of expertise includes Planning and Scheduling, Integrated Project Controls, Risk Management and Delay Analysis.

OP2 AUSTRALIA IS GROWING

Do you enjoy a challenging project? Are you motivated and strive for excellence? In 2022, OP2 Australia is looking for up to five additional Project Control and Planning specialists to add to our dynamic team.

We are a group of enthusiasts and problem solvers who are dedicated to assisting our clients with complex projects and achieving outstanding program performances. We support GMs and PMs, from implementing new management policies, to improving projects and engineering performances. We strive to make a real difference for our clients across many sectors including Rail & Infrastructure, Construction, Defence, Signalling and ICT. Additional benefits of working with OP2 include 15% employer contribution to superannuation.

If you think you are the right fit, we would love to hear from you at au.office@op2.com or visit our website www.op2project.com.au/contact-us
