

WELCOME TO Q2 2021

OP2 continues to be engaged in very important developments across Australia, where we have been providing our high-quality Project and Program Management expertise for new and existing clients. Feel free to read our newsletter for the exciting changes and developments we are part of in the second quarter.

Michael Carreiras
(OP2 Australia - Managing Director)

OP2 PROJECT UPDATE

OP2 has been busy in the second quarter securing key resources on new projects, including projects in the new location of Western Australia supporting Mining and Infrastructure industries. Worldwide, our company continues to provide our renowned expertise across multiple sectors including Health and Defence, closely collaborating with key industry leaders and government officials.

| Services provided to | Location | Industry | Expertise Deployed | Objectives and achievements |
|---------------------------------------|-----------------------|---|--|--|
| Mining & Rail Program | Australia (Perth) | Mining, Rail and Infrastructure | Lead Planner, Project specialist | Secure Project and Program Delivery, manage Engineering Interfaces, setup EVM, KPI, manage Risks and Claims |
| Engineering Management & Organisation | Australia (Melbourne) | Infrastructure, Transportation and Rail | Project Management Specialist | Develop a Project Management Office, KPI, and ensure Supplier Contract Management |
| Vaccination program | Europe | Health | Project Manager, PMO, Project Coordinator | Accelerate the Vaccination Program, secure Project Planning delivery and provide Recommendations. Setup KPI through Power BI deployment. |
| Military Vehicle Program | Europe | Defence | PMO, Project Manager, Cost Controller | Develop and manage Project Planning and effective Cost Control |
| Infrastructure Program | Australia (Brisbane) | Transportation, Rail and Manufacturing | Engineering Project Control and PMO Specialist | Implement detailed Project Planning, Costing and Project Visual Management |
| Construction Program | Europe | Construction | Project Managers | Develop and implement an accelerated Delivery Program |

OP2 ENGAGEMENTS & EVENTS

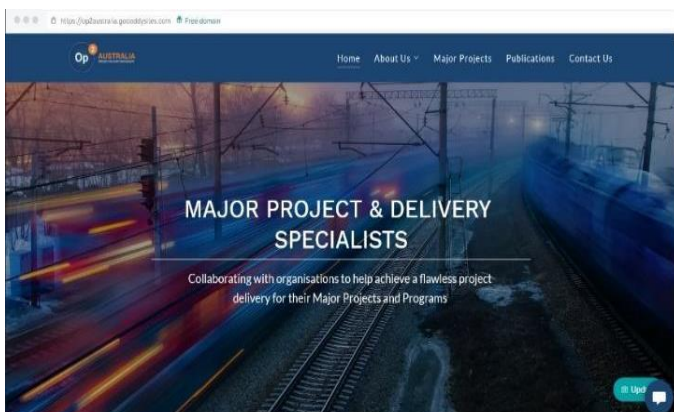

In early April, Transdev Australasia launched its 100% sustainably powered full-size electric bus at the Capalaba Depot that has been manufactured locally in Australia. Transdev will operate the bus on Translink routes in the Brisbane and Redlands regions, under a two-year agreement with the Queensland State Government.

As Project Delivery specialist and FACCI Transport & Infrastructure subcommittee Lead for QLD, Michael was impressed at Transdev's commitment to successfully delivering an innovative project that will provide improved social, economic and environmental outcomes for the Greater Brisbane community. OP2 is looking forward to supporting and sharing their expertise for such innovative projects in Australia.

I would like to thank Transdev CEO Luke Agati and his team for inviting us to this special launch. And congratulations once again on a project well delivered!

OP2 WEBSITE LAUNCH

visit <https://op2projects.com.au>

OP2 Australia now has a new website! Our new website provides details on our Australian expertise and experience, as well as the services we have on offer for your projects and programs. You will also find many of the materials we have published on LinkedIn are now available for your viewing on our new website.

We would like to thank everyone for all the positive feedback we have received throughout this launch.

OP2 PROJECT SPECIALIST INTRODUCTION

We are pleased to introduce our newest consultant **Lennard Harris**. Lennard brings over 25 years of experience working in the construction industry, including **10 years of local and international experience** as a **construction planner**. Lennard started working as a planner in **Dubai** on large residential developments including high rise buildings such as the **Burj Khalifa**. He then returned to **Western Australia**, where he worked on several mining iron ore projects, including **FMG's T155 rail expansion project**. After continuing his work overseas in **Malaysia, Singapore** and **Azerbaijan**, Lennard returned to Dubai to work on the extension of the **Dubai metro** to seven new stations. Since then, Lennard came back to Perth to work for BHP on multiple asset projects including a 100KM High Voltage Overhead Line and the fabrication of a new coal Ship loader. Lennard has now joined OP2 to work on a complex **Mining and Rail Project** for our client in Perth.

OP2 project locations

"What are you most looking forward to in your role at OP2?"

"I am most looking forward to being able to learn from and leverage OP2's proven processes and methodology of project management to add greater value to the projects beyond just planning and scheduling risk, all while working with a group of like-minded professionals and taking myself and my career to the next level in the project management world. I am also very excited to be adding Perth as a new project location for OP2 Australia "

OP2 PUBLICATIONS

At the end of May, we published a video focusing on **Independent Project Assessments**, where we discussed how acquiring an external view of your project will help your organisation in identifying issues that are affecting project performance and delivery.

To find out whether your project needs an independent assessment, feel free to click on the link provided.
