

A Brief Guide to Teaching and Learning in the Digital Age

EDUTOPIA VIDEO LIBRARY: A selection of brief, research-based videos that highlight best practices in project-based learning, formative assessment, classroom management, and student engagement.

CRASH COURSE: Crash Course provides free, excellent instructional videos in more than 50 subjects, including computer science, literature, science, and history. Students, educators, and lifelong learners turn to it as a resource because of its weekly releases that make difficult subjects easier to understand.

YOUTUBE EDUCATION provides free, engaging videos that teach academic subjects, practical skills, and concepts to learners of all ages, anytime, anywhere in the world.

THE SHAKE UP LEARNING SHOW – HOSTED BY KASEY BELL Podcast focuses on lesson planning, edtech integration, and equipping educators with useful, tech-savvy advice.

TEACHERS ON FIRE – HOSTED BY TIM CAVEY Features weekly interviews with innovative educators discussing classroom strategies, digital tools, and professional growth.

CLASSROOM DYNAMICS: A TEACHER PODCAST with a particular emphasis on 21st-century education skills, one of the most creative, hip, and fascinating podcasts for teaching and learning. Adam Todd, host.

CULT OF PEDAGOGY: JENNIFER GONZALEZ

Jennifer is a full-time education thought leader who was once a classroom teacher. She offers useful, evidence-based pedagogy, classroom management, and technology integration strategies on her website, Cult of Pedagogy. Her work gives teachers the confidence to embrace innovation while maintaining a solid foundation in good teaching techniques. She still has an impact on thousands of people in 2025 thanks to her podcast, blog, and professional development materials.

UNESCO: The United Nations organization that promotes cooperation in education, science, culture and communication to foster peace worldwide. Digital technologies have developed into strong worldwide networks that link resources and people while providing creative answers to both domestic and international problems. They improve governance, inclusion, quality, and accessibility in education.

EBSCO: A comprehensive research platform that provides academic resources, journals, eBooks, and scholarly articles.

SPRINGER NATURE LINK: The academic journal Educational Technology Research and Development focuses on educational technology research and development.

MONICA BURNS, THE CREATOR OF CLASSTECHTIPS.COM AND HOST OF THE EASY EDETECH PODCAST, is an EdTech consultant and former public-school teacher in New York City. Her book, *EdTech Essentials: 101 Strategies for Every Classroom in the Age of AI* (2024), focuses on pedagogy-first approaches to help teachers effectively integrate technology. Her dedication to intentional digital learning is reflected in her motto, "tasks before apps."
