

Dear CMS,

I am writing on behalf of my **(sister/colleague/friend/patient)**, **(Name)**, who has been affected by breast cancer. **(Name)** considers herself fortunate to have had the option to choose what reconstruction procedure would be best for her, and she doesn't want to see that accessibility be threatened by the decision to sunset the S-codes that allow for muscle sparing, natural tissue breast reconstruction.

I am writing to ask you to please reinstate the original CMS individual insurance billing codes without condition, which will enable other patients to have access to these advanced reconstruction surgeries.

Thank you.

**(Your Name)**
