

STEELCRAFT

PRODUCT BROCHURE

Carefully Crafted.
Highest Quality Steel.
Superior Service.

Let SteelCraft Structures assist
you in completing your dream
garage or carport project.

INTRODUCTION

SteelCraft is built by hardworking individuals who are committed to filling the void of excellent customer service in the garage and carport industry. We build with only the highest quality materials to provide the end user with a high yield return for the investment in a structure. We are a full service provider that manufactures the components in-house from order to completion.

EXCELLENCE BY DESIGN

Whether you are needing a cover to protect your vehicle from the sun, or a full-scale commercial structure for your antique vehicle collection or mechanic shop, choosing the right manufacturing and construction company is the key. We bring years of experience in construction and design of pre-engineered and custom structures. We live by the motto, "If it is worth doing, it is worth doing with excellence."

The SteelCraft Process

FRAME STYLES

FRAME STYLES

REGULAR

As traditional as it gets, this style has the roofing panels installed directly to the trusses horizontally. If you are looking for a great product at an economical price, this would be a great choice for projects up to 36' long.

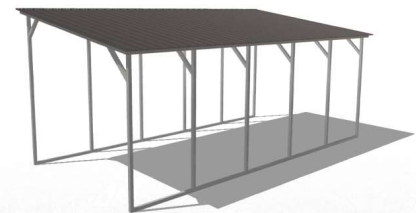

BOXED EAVE

Like the economical factor with the regular style but want a more traditional A-frame look? This style adds a six inch eave to your structure with panels installed horizontally. A great option for projects up to 36' long.

VERTICAL

This is our best selling and most sturdy-built style. All the panels are run vertically, so there is no cap on the length of your project. We will install the highest quality bracing over the trusses to create the roofing system needed to install the panels and ridgecap.

LEAN TO

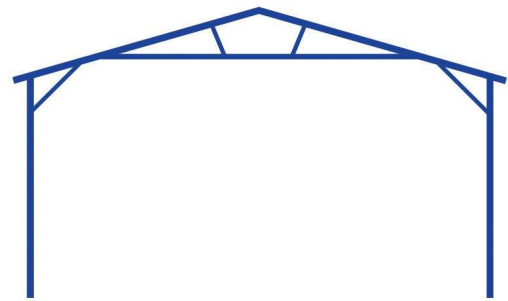

Great for that specific look to your project that you are looking for. This style offers up to 16' wide and has no cap on the length. We offer 1/12, 2/12, and 3/12 roof pitch options.

TRUSS WIDTH STYLES

STANDARD

Any structure 12' - 24' wide will be constructed with a standard style bow on a 3/12 roof pitch.

TRIPLE WIDE

Projects that are 26' - 32' wide come standard with an engineered truss style that has been constructed to the highest standard by our expert welding team. You can trust that we have quality inspected each triple wide truss that leaves our factory.

CLEAR SPAN

Buildings that are 33' - 60' wide are designed by our engineering team and have superior workmanship built in as all truss styles do. Clear Span trusses are paired with our signature ladder legs to get that extra assurance in quality.

LEG STYLES

LEG STYLES

STANDARD LEGS

We offer single legs on all structures up to 32' wide and 12' tall as a standard. If your structure is 13' tall and is not enclosed, we are also able to construct your project with standard legs.

DOUBLE LEGS

Double legs come as a standard on our units up to 32' wide and 13' to 16' tall to ensure that your structure has superior strength and quality.

LADDER LEGS

Our signature ladder legs are standard on all units up to 32' wide and 17' - 20' tall and all Clear Span trussed buildings.

STEELCRAFT WARRANTIES

STEELCRAFT WARRANTIES

365 Limited Workmanship Guarantee

All buildings are protected with a 365 day workmanship warranty. Your structure is an investment and needs to be protected. We are proud to stand by our workmanship.

This Warranty Covers:

- General Workmanship
- Water penetration from the roof
- Proper installation of doors and windows

Please see the SteelCraft Structures warranty document for the full details of inclusions and exclusions from the warranty.

STEELCRAFT WARRANTIES

Continued

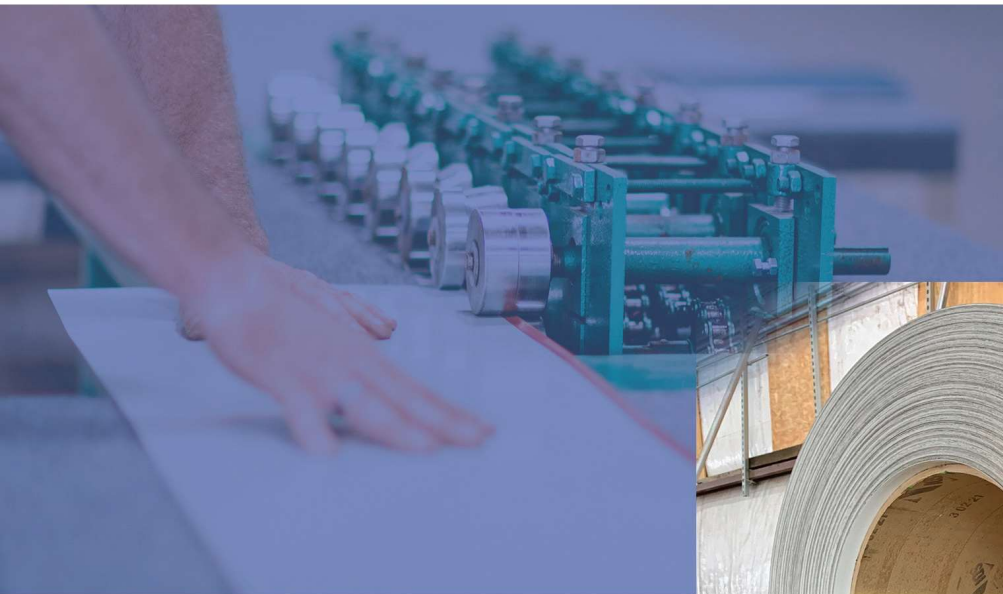

40 Year Limited Paint Warranty

SteelCraft protects your building roof and wall sheets with an industry leading 40-year warranty. This warranty is supplied, for the most part, as a pass-through warranty from the sheet metal mill and the paint supplier, Valspar®.

This Warranty Covers:

- Chalk and Fading
- Paint Adhesion
- Chipping, Cracking, and Peeling
- Rust Perforation

Please see the SteelCraft warranty document for the full details

Optional Features

Optional Features

Garage Doors

We offer many rollup garage door sizes to fit your needs.

Available Sizes

- 6'x6'
- 8'x8'
- 8'x10'
- 10'x10'
- 12'x12'
- 14'x14'

Don't see the size you are looking for? Ask for a custom size frameout and we will setup your structure for a third party to install your custom size door.

Windows

We offer two standard sizes for single pane sliding windows.

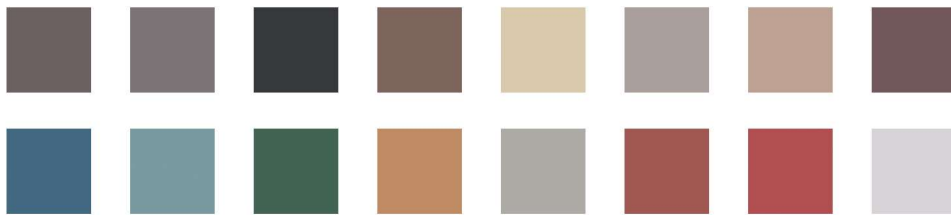

Available Sizes

- 30"x30"
- 30"x36"

Standard Paint Colors

We offer a vast selection of standard color options that are available for your structure.

Vertical Siding

Our units are built standard with horizontal metal siding, but we also offer a vertical siding option for your dream structure.

Wainscot

Want to spice up your building even more? We offer a second color option for your structure walls. The wainscot is 3 feet at the bottom of your structure.

Features Include

- Vapor Barrier
- Reduces Sweating
- Reduces and blocks out radiant heat
- Economical Price

Fasteners

- Colored Screws are available
- Self-sealing
- 50 year warranty
- Premium capped head

Design

Every SteelCraft building is custom designed and then fabricated to meet the unique needs of your building project. We never outsource manufacturing or design overseas. Every one of our projects is designed and fabricated in house. This means that if you need to speak with anyone on your project team, they are just a phone call away.

Superior Materials

SteelCraft uses the highest quality materials available on the market. Other companies prefer to use cheaper products which keep their pricing lower. We know you are looking for a long lasting investment in your structure and we take that seriously.

The SteelCraft Structures Process

1

Estimation

We design your building and provide the total cost.

2

Order Received

You will receive a call within 48 hours on business days to review and accept your order.

3

Fabrication

We will let you know when your structure is being fabricated.

4

Planning

We plan a time that works with you to install your structure.

5

Installation

we begin construction of your structure on-site.

6

Project Completion

Congratulations! It's time to put your feet up and enjoy your new SteelCraft Structure!
