

# The Door County Invasive Species Team

Empowering Door County citizens and municipalities with the information, tools, and skills to tackle invasive species.

Dear Door County Resident,

The Door County Invasive Species Team (DCIST) has been a model cooperative weed management group for the state, bringing together natural resource groups present in your community, for over 20 years!

In 2024, with the help of various Invasive Species Education and Outreach grants, Cooperative Weed Management grants, Invasive Species Control grants and donations obtained through generous donors such as yourself, the DCIST was afforded the opportunity to:

- Offer training and outreach for invasive species identification and monitoring, participating in over 16 webinar, interviews, and volunteer events. Engaging over 25,000 people through news interviews, media platforms, and one-on-one site visits.
- Promote the adoption of Door County priority/Phragmites ordinances in ten towns and the city of Sturgeon Bay. DCIST continues to conduct outreach and education within these municipalities to ensure successful ordinance implementation.
- Install 2 CD3 boat cleaning stations and 2 simplified boat cleaning stations, providing aquatic invasive species prevention tools to over 95% of county boat launch users. Install 3 boot brush stations along the Ahnapee Trail.
- Inventory and control 225 acres of priority invasive species.

**Your continued financial support of DCIST is crucial to our efforts of invasive species education and management throughout the County.** To keep up to date on all of the invasive species projects and efforts going on in the county please visit our website at [www.doorinvasives.org](http://www.doorinvasives.org). Make sure to follow the Door County Invasive Species Team (DCIST) on Facebook.

Your contribution of any dollar amount will help DCIST to achieve our mission to empower Door County citizens and municipalities with the information, tools, and skills to tackle invasive species. These efforts are critical to help preserve Door County's beautiful and unique ecological landscape.

Thank you!

Jason Miller | Conservationist & Coordinator for the Door County Invasive Species Team
