

Artificial Intelligence
and TimeWaver

Virtually
Unlimited
Knowledge!

Information for professional users

Time**WAVER** 

Virtually Unlimited Knowledge!

The TimeWaver software has always contained a wealth of databases on a wide variety of topics from which specialist users in the healthcare, business and coaching sectors could benefit.

Still, the latest developments in AI (Artificial Intelligence) take TimeWaver to a new level: We can now combine the infinite knowledge from the Information Field with the almost unlimited knowledge of Artificial Intelligence!

This enables TimeWaver users to gain valuable additional information on individual analysis results.

An Example:

More precise information is needed on a homeopathic remedy. Or a specific technical term to better understand the results of a Business analysis.

In the past, TimeWaver users often had to conduct time-consuming research on the Internet, using various search engines and sources and compile the desired result themselves.

Those days are now over for good: You can now easily ask your questions directly to an Artificial Intelligence component in the TimeWaver software with just a few clicks!

It's really very simple:

Step 1

Open the question interface with one click in the analysis results list.

Step 2

Send the question via the individual entries in the analysis list.

Step 3

Read and interpret the result.

This new AI function makes it easy to query existing knowledge worldwide, round off the workflow and quickly answer complex questions. This means you can concentrate fully on your work with the TimeWaver system!

Have we piqued your interest?
