

The 6-Star Experience

Google caps reviews at 5 stars. The heart of your home deserves more than that.

Every Cabinet IQ project is held to a higher standard — one built around six commitments we make to every client.

1

★

Clarity

You'll have total understanding of the project design, construction scope, timeline, and budget — before a single cabinet is ordered. No surprises, no fine print, no guessing.

2

★★

Cut

Only master-level certified installers perform the work. Our carpenters and countertop installers use professional-grade tools to ensure precise, clean results on every kitchen and bath — every time.

3

★★★

Commitment

A 6-star experience isn't a tagline — it's a standard we hold ourselves to on every project. We run a 57-point pre-construction checklist, follow strict internal processes, and don't consider a job done until you're 100% satisfied. If something comes up, you'll hear about it from us directly — with a solution and a timeline.

4

★★★★

Competent

Every person on our team is deeply trained in their area. We're not generalists. Our designers design, our project managers manage, and our installers install. Knowledge is a core value here, and we're constantly improving.

5

★★★★★

Considerate

A remodel disrupts your home and your life, and we take that seriously. We show up when we say we will. We protect your workspace. We leave your home cleaner than we found it — cabinets and drawers vacuumed out and wiped down. We respect your time, your space, and your investment.

6

★★★★★★

Cooperative

Your vision drives the design. Our job is to understand it clearly, execute it precisely, and keep you informed every step of the way. Before, during, and after your project, we communicate proactively — so you always know where things stand.
