

OASIS Offers Additional Tools for Apprentices with Learning Disabilities and Testing Anxiety

Did you know that – The Online Apprentice Support Initiatives for Success (OASIS) is more than just online learning and courses???

As part of the program there is a complimentary tool called the Virtual Learning Strategist (VLS) which is a customized learning system to help **YOU**, the apprentice, get through the testing phase of your journey to becoming a certified electrician.

Do you have anxiety when taking tests? Do you have a diagnosed or even an undiagnosed learning disability? Reading issues? Let us help! Your IBEW training center has secured this tool for **YOU**.

The program and content delivered is 100% customizable depending on the apprentices needs. Our top interventions used are:

- ✓ Study Skills
- ✓ Test taking strategies
- ✓ Technical Tutoring
- ✓ Learning disability specific interventions
- ✓ Exam accommodations based on need and eligibility and so much more.

There are **no set schedules, no specific number of hours required**. Your designated learning specialist, who knows the curriculum, will work with **YOU** when **YOU** require it!

Typically to get started most will meet virtually with their learning strategist 1-2 times a week for 30-45 minutes and less frequently as they go along. It is completely at your pace and on your timeline.

This invaluable support is unique to your IBEW training center. What are you waiting for?

Best of all, IT IS FREE!
