

Demolition Permits

Demolitions and removals cannot commence until a **valid permit** has been issued by the municipal office.

Demolition Permits also allow removal of a building from your property taxes!

Owners are responsible to have all underground facilities located prior to commencing demolition and removal.

Hazardous material must be handled and disposed of in compliance with **Provincial Regulations**.

Should it become necessary to close or block any road, street, lane, or sidewalk during demolition, the owner or owner's agent must obtain the prior written approval of the **Local Authority**.

Owners must supply and maintain all fencing, boarding or barricades required to warn and/or protect the public from the work in progress.
