Security Awareness Training

Protect Your Business by Educating Your Team.

NetGain's **Security Awareness Training** is a *live*, one-hour session designed to equip employees with essential cybersecurity knowledge and tools.

We discuss phishing, password security, threat detection, and more, ensuring your team is prepared to recognize and report on today's security risks.

Key Benefits of NetGain's Security Awareness Training

Compliance with Industry Regulations

- Training employees can be a cybersecurity requirement, helping businesses meet compliance standards for CMMC, HIPAA, or GDPR.

Reduce Human Error

- Security awareness training helps employees recognize and avoid phishing, ransomware, and social engineering attacks, reducing the risk of breaches.

Reduce Downtime and Financial Loss

- By preventing cyber incidents, businesses avoid costly disruptions, data breaches, and reputational damage.

Build a Stronger Security Culture

- A well-trained workforce fosters a proactive security mindset, making cybersecurity a shared responsibility across the organization.

Earn Certificates of Completion

- Employees receive a certificate upon completing our training, demonstrating their cybersecurity knowledge and reinforcing accountability.

Who Needs Security Training?

- Business Owners
- C-Level Executives & Management
- IT & Security Leaders
- Any Employee Who Uses Technology
