

Undeniable, Demonic Western A.I.

Steve K Briggs (Yayayar)

February 13th, 2026 (Greg); Jan 31st, 2026 (Julian)

I downloaded and outlined the images in this report, primarily on February 11th and 12th, 2026 (Gregorian), and sat down to write the report a day or two later, from about 8:50pm to about 10:15pm, February 13th, 2026 (Gregorian). Hopefully the report does not suffer from my hurried execution.

On February 11th, 2026, I was watching the Mexican version of *France24* on my antenna TV service (France 24 is a corrupt, privately owned French news service, created to glorify the West, via skillfully executed disinformation). As I watched a fake report about Iran, the flagrantly artificial intelligence produced image below, appeared:

At my earliest opportunity, I went online, and found *France 24 Español*, and downloaded the image (above). Can you see the clearly fake element.

In the zoom enlargement, above, you should see the English words “without caption,” at the base of the central protest sign.

The clear and flagrant problems are: (1) Iraq is a non-English speaking country, so an English message at the base of a protest poster is almost certainly not going to appear in Iraq; but (2) the bigger problem with the “without caption” caption was it was deliberately designed to look as if the A.I. film producer/editor forgot to insert an Iranian protest message. This was almost surely done as a joke, Satan’s way of saying, “The Western world is so stupid, I can put this clear evidence of AI fakery in their face, and they still won’t take action, and bring down the media and tech elites that control their countries, via bribery.”

If you are able to find the video, before France 24 removes it, under scrutiny, you will notice the crowd appears fake, and moves in a fake sort of random wave-like way.

Satan included some of his standard messages in the image, like “Fake”, below.

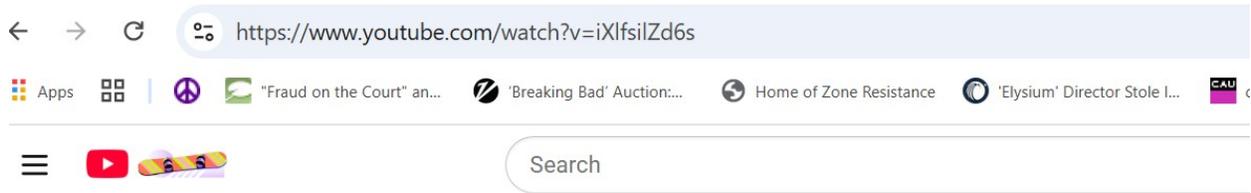

Satan also signed his name in the image (below).

Satan also included his fairly standard “A.I.” message:

Satan played with the “stupid, lazy Western citizens” again, in this same report, by showing a series of images of Iranian rockets, and in one of the AI images, the fake Iranian rocket was marked with English lettering, seen in the image below.

The letters Z and A are not part of any Iranian alphabetical system. The rocket is also not Russian. There is no Z in the Russian alphabet. If my research is not mistaken, the marking on the rocket below are Iranian.

France 24 and many other stations also aired a video of Canada's Prime Minister speaking about a school shooting.

The central arrangement of the TV image appeared to carry an important AI message:

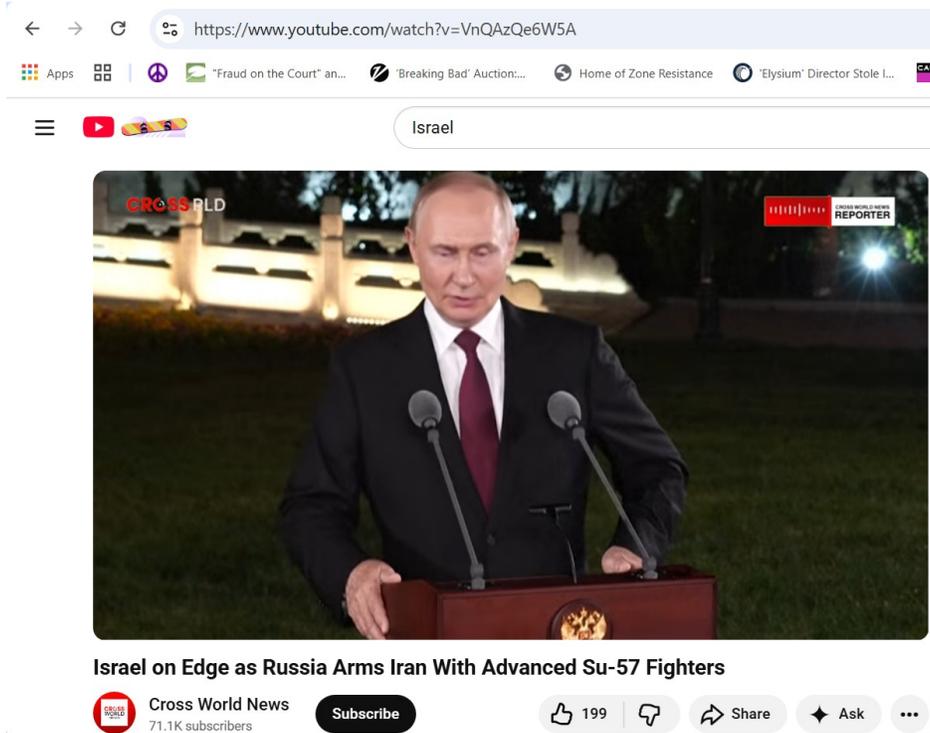

For this image, Satan broadened his A.I. vocabulary, "Deception":

These hidden AI messages may suggest Mark Carney was killed in the true One Hour War, or maybe in the days after. I have no idea when we'll know the truth. I am just showing you the AI messages I see hidden in the images.

The biggest surprise in my recent AI news research are the two images below, of Vladimir Putin, from news reports posted on “Cross World News” (a news service that I am not familiar with). See if you can see any hidden AI messages. I’ll show you what I see on the following page.

With these images, Satan, via AI, seems to be saying Vladimir Putin died on February 5th, 2026 (2/5/26), Gregorian. This would be about 29 days AFTER the true date of the One Hour War.

I do hope this is mistaken. But it is what I see.

Hopefully, we'll learn the truth soon.

Confirmation of the previous information.

Again, I sincerely hope this is mistaken. My apologies to Vladimir Putin, and the great people of Russia, if I am mistaken; otherwise, my sympathies.

Hopefully the west will get rid of AI and take control of its media and information portals and stations and we'll learn the truth soon.
