

InnoVoTek Private Limited

About us

InnoVoTek Private Limited was incorporated in the year 2018 with the objectives of providing “innovative”, “technological” and “sustainable” products and services. Our activities aim at mitigating the impacts of climate change, enhances ecological services, restore biodiversity and increases livelihood support system of the people. Our highly customised and practical solutions help individuals, institutions, communities, corporations and Governments to take carbon neutral pathways of development. InnoVoTek advisory services also helps our clients to integrate SDGs in their projects and programmes to contribute towards creating a more sustainable and just world.

Vision, Mission & Values

VISION

Support individuals, communities, businesses and Governments to integrate nature-based solutions to achieve climate resilient world and Sustainable Development Goals (SDGs).

MISSION

Our green initiatives and projects will revolve around improving health, social, environmental, and economic development aspects of all stakeholders thus contributing to the local, regional, national, and global efforts towards achieving carbon neutrality.

VALUES

Innovation, Excellence, Highest Standards and Accountability

ISO 9001: 2015 & ISO 14001: 2015 certified company for quality management system and environmental management systems respectively.

Our Services

RESEARCH, CONSULTING AND ADVISORY

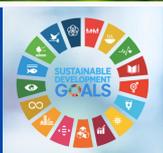

- We undertake interdisciplinary research studies in the areas of ecology, environment, social and economic aspects.
- Environmental regulatory and compliance studies/ assessment as per mandates of respective agencies.
- Social due diligence audits and Social Impact Assessment studies.
- Resource use efficiency studies such as water and energy. It includes watershed development, river basins, ground water studies, storm water management and flood control etc.
- We undertake project feasibility studies, preparation of detailed project reports on renewable energy, eco-restoration and other green infrastructure projects.
- We also carry out need based project monitoring and mid-term and end-term evaluation of development projects, CSR project and any other impact assessment studies.

"Let us work together and achieve a carbon neutral world."

INNOVOTEK STRONGLY SUPPORT NATURE BASED SOLUTIONS

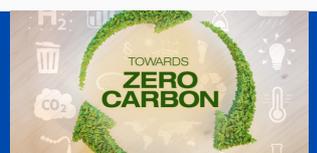

"You have to be the change you wish to see in the world."

RESTORATION AND THEME BASED GREENING

- Ecological restoration of large landscapes, seascapes can be undertaken which includes maintenance until the restored eco-system reaches to self-sustaining stage.
- Demonstrated expertise in creating novel greening projects, thematic gardens such as sensory gardens, spiritual /cultural garden, butterfly garden, bird parks etc to choose the specific requirements of the clients.
- Industrial green belts /green spaces using most suitable native species which can abate noise and dust pollution. Also the gardens we create can consume treated waste water from manufacturing /process industries, thus reduce the expenses on disposal of waste water.
- Project planning, execution and implementation assistance on mass scale plantation including building modern nurseries.

EDUCATION AND OUTREACH

- Assist our clients to devise effective communication and outreach strategies, tools and techniques in their IEC programmes
- Undertake content creation for booklets, posters, brochures, stickers including digital medium such as websites and mobile application on themes such as Sustainable Development Goals (SDG), Carbon Neutrality, Biodiversity Conservation to suit different target audiences.
- Organise and conduct or facilitate training and capacity building to different stakeholders on SDGs, Climate Change mitigation and adaptations, Biodiversity conservation etc.
- Host events such as seminars, symposiums, conferences and roadshows /campaigns on the above mentioned themes.

Expertise Available

- NABET Accredited Environmental Engineers
- Coastal Ecology and Marine Biologists
- Hydrologists
- Social Scientists
- Third-party Laboratory arrangements

Projects Implemented

- Engaged in the eco-restoration of Adyar river especially on regeneration of mangroves for the past 15 years (Phase I & II)
- Implemented the eco-restoration of Cooum river in its first phase
- Currently implementing eco - restoration of Adyar river (phase III)
- Directors have carried out consulting assignments for Asian Development Bank, DFID, SDC, JICA and other multilateral agencies.
