Meet Your Education Director

My name is Dr. Alicia Brown and I am so happy you chose our learning community. I have worked over 23 years in community, healthcare, and post-secondary education and have taught many students in multiple areas of specialty. My experiences have allowed me to see both sides of the educational spectrum as a learner and instructor. While serving in multiple capacities, I learned how to create, develop, implement, coordinate, instruct, assess, and evaluate different types of courses and programs.

So, now I am a developer at heart and I love to empower others to succeed. I've received many ideas over the years for a training school but was not prompted to implement it until now. My main goal of the school was to assist businesses and individuals with accessing, delivering and tracking required health care competency training. I later realized that the school would also promote learning and provide opportunities for people to succeed. So, with my educational and community driven spirit, I have finally implemented the Virtual School of Health. The Virtual School of Health provides online training for everyone. We offer Healthcare Training Bundles, Emergency Task Force Team Training, Compliance, Human Resources, Harassment, Leadership and Management, Financial, Employee Skills and More. The school's curriculum is based on expert knowledge in the field and all training is evaluated to meet mandatory and governmental requirements.

I look forward to working with you and seeing you online soon.

Dr. Alicia Brown

Healthcare Online Courses

Ergonomics: Preventing Musculoskeletal Disorders-55 minutes

Sometimes employees are exposed to work-related physical injuries that affect their well-being and productivity. With ergonomic solutions, you can prevent such unwanted situations. This online training course on work-related musculoskeletal disorders discusses the common musculoskeletal disorders in the workplace and ways to eliminate them through ergonomics. The course also includes a handout, worksheet, scenarios, and final assessments.

Back Injury Prevention Training Course-1 hour

Understand and prevent the hazards of back injury. The issue of back injury and back pain can strike anyone at any age. Wrong postures, heavy lifting, and repetitive movements can put undue pressure on your back and result in injury. Back injuries can interfere with your daily activities, including your job. This course will help you identify the common causes of back pain, the associated risk factors, and the measures you can take to prevent back injury, including stretching techniques and safe work practices. You'll also get to know the work hazards that can trigger back pain. The course includes handouts, scenarios, and final assessments.

Infection control: Bloodborne Pathogens Training Course-1 hour

Prevent or control exposure to bloodborne pathogens by your employees
This bloodborne pathogens training course is designed for employees who may come into contact with bloodborne infectious microorganisms. They include frontline medical workers, housekeeping staff, and waste pickers. The course uses OSHA-approved content on what bloodborne pathogens are, ways to prevent exposure to bloodborne pathogens, and actions one can take in case of exposure. The course also includes scenarios, quizzes for assessment, and feedback surveys.

Employees Workplace Diversity Training-1 hour 20 minutes

In this course, you'll learn everything about workplace diversity, including all the necessary steps for creating a diverse workplace. It discusses the major challenges that

Healthcare Online Courses

organizations face, such as communication barriers and resistance to change. At the end of each chapter, you'll find quizzes to test your knowledge.

Diversity and Sensitivity Training-1 hour

Train employers and employees on the importance of a diverse and inclusive workplace. Understand the significance of diversity, equity, and inclusion to an organization. Find out why human beings are generally predisposed to unconscious bias and what you can do to overcome it. Go through the practical examples of what leaders can do to promote diversity and inclusion in the workplace. This diversity and sensitivity course discusses all this and more to empower you to build an inclusive workplace.

Communication Skills for Managers-50 minutes

Develop effective communication skills & grow your interpersonal relationships. Besides technical knowledge, excellent communication skills are also a must-have quality in managers. This will help them in their role of inspiring and leading others successfully. Through this course, you will be able to identify common communication barriers, understand ways to resolve obstacles to communication, master different communication methods, and learn how to communicate effectively with team members. The course also discusses a communication plan and strategies and includes worksheets and scenarios.

Overcoming Communication Barriers-45 minutes

Learn to identify & overcome the roadblocks to effective communication

Barriers to communication are the things that get in the way of your message being received. This course will help you understand common communication barriers and overcome them. In this course, you'll learn the different types of barriers, such as environmental barriers, inner voice, and listening habits. And you'll learn techniques to overcome the barriers. You'll learn how to change conversational barriers that may be getting in the way of clear communication, and build mitigation tactics for successful communication. With these tools, you can build relationships that work and bring genuine empathy to conversations.

Healthcare Online Courses

HIPAA Compliance Training Course-1 hour 50 minutes

HIPAA, or the Health Insurance Portability and Accountability Act, is a United States legislation aimed at safeguarding the privacy and security of medical information. It protects sensitive healthcare data from loss, theft, breaches, and compromise. Under the law, no individual or organization can disclose confidential information without a patient's knowledge or consent. The act was signed into law on August 21, 1996.

Data Protection Training-1 hour and 50 minutes

Check data breaches and safeguard your business from threats to data

The key topics discussed in this course are what is data protection, common threats to data, regulations regarding data protection, and types of safeguards. It will help you with the practical steps you can take to prevent rising cases of data breaches. You'll find a quiz in each chapter to test your learners' knowledge as well as a feedback form.

- Data Protection Regulations
- HIPAA

Fire Extinguisher Safety Training Course-30 minutes

Ensure fire safety through the correct use of fire extinguishers

First extinguishers play a critical role in saving properties and lives from fire outbreaks. But a tool is only as good as its users, and a fire extinguisher is no exception. To use them effectively, you should know how to operate them correctly. If you're a firefighter, a facility manager, or just anybody who plays a safety role in your organization, this course is for you. By the end of this course, you'll understand the basics of fire, know the types of fire extinguishers, know when to fight a fire and when to evacuate, and understand how to operate a fire extinguisher properly.

Standard Precautions: Personal Protective Equipment (PPE) Training-1 hour 30 minutes

Protect yourself from work-related illnesses and injuries. Identify the types of personal protective equipment that are used in various industries. Know the hierarchy of controls related to PPE, the training requirements, and the responsibilities of both employers and employees.

How to Protect Yourself & Others From Coronavirus-40 minutes

Stay safe from COVID-19 and prevent the disease from spreading. This quick course provides information on what is coronavirus and how to protect yourself and your loved ones from this pandemic. Bust some of the greatest myths about the virus and learn how to stop it from spreading uncontrolled. Apart from a quiz to test your understanding, the course provides helpful links and FAQs.

Emergency Response Action Plan Training-1 hour 10 minutes

Prepare yourself for any disaster or emergency situation anytime, anywhere. Natural and man-made disasters can strike you anytime, regardless of the industry. Prepare yourself for these emergencies and know how to respond quickly and effectively with this training course. Minimize injuries to humans and damage to properties. It is better to be prepared than caught off guard.

Emergency Response Task Force Team Training Program

Join us in preparing your workforce or organization by becoming part of our Emergency Response Task Force Team. We'll train 3 or more of your employees to become ERTF responders for your organization.

Our Statement

ERTF Responders in our Emergency Response Task Force Team Training Program are prepared to begin further training as a personal care aid, patient technician, or certified nursing assistant. These responders are also prepared to respond to emergencies within their business or organization.

ERTF Responders will receive continuous monitoring and BLS training through our RQI platform for quality and compliance training.

ERTF Responders who are not interested in future health careers can choose our non-clinical training options below unless they would like to gain Basic Life Skills as a personal care aid/technician for their family, future health care opportunity or other areas.

Emergency Task Force Training Course Structure-Clinical with 2 AHA Certification cards

****American Heart Association's Basic Life Support-(BLS) Course (Renew every 2 years)**
