

75 years and over? You are entitled to a Health Assessment

What is a Health Assessment?

It is a comprehensive medical assessment with our nurse and doctor.

Top to toe check up

How much does it cost?

There is NO OUT OF POCKET cost for you if you hold a valid Medicare Card.

How long does it take?

Your appointment will be 1 hour where you will have the space to discuss anything that is related to your physical and mental health.

Why do I need it?

It allows you and your doctor to discuss and address any issues that may not have been apparent in your usual appointments, due to limitation of time.

What happens after my Health Assessment?

If there health issues identified, your doctor will work with you to prioritise and come up with a treatment plan. Usually this will require a later appointment which can be made after your health assessment.
