

TAKE YOUR TURN SAVING THE WORLD!

Welcome to the future. It's not a pretty place. Not since the creatures took over, anyway. What's left is a rag-tag bunch of human survivors who live in squalor, battle their multidimensional overlords and wax nostalgic for better days. Now... a young boy named Low, his sister and a collection of fighters find themselves mankind's only hope for blasting the creatures back to where they came from. Wherever that is.

- A unique, turn-based tactical combat engine that's all about the action, not the stats, leaving you more time for destruction.
- Really leave your mark on a deformable terrain that changes as you destroy it. Blast holes in the wall, make craters out of meadows and send boulders flying like toys. Make a mess! No one will be around to clean it up.
- Compelling story in the 19-level single player Story Mode. Two-player customizable Battle Mode lets you modify the handcaps, power-ups and victory conditions. Build to suit with an experience point system that lets you share upgrades as you wish.
- Uniquely stylized high-polygon RPG characters — 18 in all — each with their own personality and attitude, let loose in a 3D world that is just as rich and full of surprises as they are.
