## The *Rockford* Files

The Series 1 woofers from Rockford Fosgate feature a new, double inverted dustcap of trilaminate construction that pumps air through more efficiently. The woofers also feature a vented coil form for increased power handling along with increased airflow between the field plate and floor piece. This new coil allows for better heat dissipation because the cavity is no longer sealed and is perforated around the coil winding.

The Series 1 woofers are available in both 4 and 8 ohms and are compatible with the new Series 1 amplifiers. Suggested retail price ranges from \$70 to \$230. Reader Service Card No. 201

## Multi-Channel *Stream*

Soundstream Technologies has introduced its new MC120 multi-channel amplifier. The unit's design includes four 30-watt channels, bridgeable into two 30-watt channels and one 90-watt channel, or into two 90-watt channels. The MC120 can accept either pre-amp or high level inputs without the use of matching devices, and has a signal-to-noise ratio of 100dB.

Suggested retail price of the MC120 is \$419.

## Command *Performance*

CSI Manufacturing and Distribution Inc. (formerly Command Start Inc.) has introduced the CS3000-Plus Remote Control Vehicle Security and Car Starter.

The CS3000-Plus combines automotive security with protective features that will shut the car down if anyone attempts to drive it without the keys in the ignition. The system includes one or two remote control transmitters and an optional audible chirp for arm/disarm and panic. The unit is also equipped with four discrete alarm zones, defective zone alert, automatic defective zone bypass, and automatic rearming.

Suggested retail price for the CS3000-PLUS is \$399.
