

Shake, rattle and roll

Get ready . . . your bones will shake . . . your teeth will rattle . . . the earth will roll under your feet. Volcano has erupted. Putting the heat on the competition like it's never felt before.

The ultimate in design. Superlative performance. Outstanding durability. Stanford Acoustics is a prime manufacturer with over 25 years of experience in speaker design. Now its expertise in Pro-Sound and Hi-Fi has been put to use with its exciting new line of Volcano Autosound separates.

Over 30 models of cast and stamped framed sub-woofers and midranges ranging in size from 3" to 18". Tweeters with the latest in technology including titanium, aluminum and soft domes. Unsurpassed in customer service and dealer support with one of the best warranty programs going. You'll hear wide dynamic ranges, fewer distortions and volumes that will blow your mind!
