fuelenex

WHO ARE WE?

FuelEnex is growing from being a regional operator in the oil and fuel trading industry, to an international independent commodity trading company with an increase in turnover, providing integrated trading products and logistics services for participants in the worldwide oil and energy markets.

FuelEnex' solid financial position and reputation for operational excellence is providing an ideal platform for growth, and in the months to come, we will have expanded operations into Asia, the Middle East and the Americas as well as The Caribbean.

As a core aspect of our growth strategy, we will be making investments in energy infrastructure complementary to the company's trading function. FuelEnex will be acquiring storage tanks, transport vessels and Joint Venture production contracts.

Our team has a long-term, integrated and committed approach to trading and portfolio management across the value chain and across products. We focus on creating innovative products and solutions, built around a broader range of commodities-all of which serves to enable our clients to meet their objectives.

The main trading offices are located in Miami, London, Madrid, and Puerto Rico. We also use a network of representatives around the globe. FuelEnex is a supplier to large resellers, major buyers as well as the UN (UNESCO/UNGM) and IATA members.

HOW DO WE OPERATE?

Working with our global industry partners FuelEnex has the ability to efficiently and effectively source any crude or refined product but mainly deal with all types of diesels, fuel oils, aviation kerosene, and gasoline as well as gases and crude oils.

FuelEnex is engaged in the wholesale purchase and distribution of finished petroleum products, both domestically and internationally. Our operations are centered by selling products at competitive prices with timely delivery to transportation companies, airlines, sovereign countries and various other buyers. As a true marketer we are in the position to make the proof of funds needed to the refinery and then purchase directly and resell to our end customers with neither side having contact or negotiations with the other.

Our company is client-driven in the sense that we recognize and fulfill the complete fuel needs of our clients. As a growing consortium, we add services on a continuous basis to reflect changing needs over time. Our fuel and oil offerings are highly privileged. FuelEnex does not promote or advertise in the broad market. We target and cater to end buyers and their representatives.

OUR CODE OF ETHICS

FuelEnex strongly believes that strong and reliable working relationships lay out the foundation to successful business collaborations. The establishment of good and clear communications will promote long lasting and profitable business relationships.

The company is convinced that, the pursuit of economic wealth in the hydrocarbons industry needs to be complemented by code of ethics pertaining to mutual integrity, transparency and trust. FuelEnex is instrumental in filling this gap between suppliers and customers.

Through our global network of refinery groups and suppliers, we have quickly developed an enduring and robust relationship worldwide. We work strategically to create a perfect balance in the associations with both our suppliers and buyers. FuelEnex takes its time to work with each supplier and customer closely so that we can custom deliver offerings that meet the specific needs to our clients. To guarantee that we perform on our delivery of quality offers, all of our suppliers and customers have been through a complete and extraneous due diligence process.

WHO DO WE SERVE?

We sell our products directly to commercial, industrial, and wholesale customers as well as NGO such as the United Nations. We enter into supply contracts with our customers and require customers to purchase a minimum amount of specified petroleum products at sub-market prices during each period of the contract.

Besides having a global footprint in the marketing of hydrocarbons, we specialize in the supply of fuels to the Caribbean Island Nations as well as select Central American markets.

FuelEnex buys, sells and supplies crude oils, refined products, natural gas and gas liquids for its global customer's operations as well as their respective refining and marketing network. FuelEnex provides a critical link between the market and its customers upstream, downstream and refining environments.

The company manages global supply, trading and logistics of a wide range of products, including feedstock, fuels, and refined products manufactured, distributed and sold through FuelEnex' partner and marketing system. The company's supply and trading activities are organized by crude oil, natural gas and products.

The pricing structure that FuelEnex follows on a global scale is based on Platts and depends where the fuel is sold. This model gives transparency to any fluctuations in world oil prices. Prices offered reflect FuelEnex' purchasing capacity with the international oil companies.

While the majority of the company's activities are the result of internal prospect generation, we remain open to participation in opportunities generated by others that are consistent with our operating philosophy and meet our technical and economic criteria.

HOW DO WE BUY AND SELL?

Due to the difficulty of the transactions and the high monetary value of the operation(s) and of the fuels/oils, FuelEnex has implemented a very detailed procedure with minor distinctions on the terms for each transaction and/or contract. We will require the financial capability and simultaneously issue a performance bond on the fuels/oils as well as an independent laboratory test report, at the expense of the interested parties.

Upon the verification of authenticity of the submitted documents and the satisfactory completion of our required due diligence, we will issue a full corporate offer and sales & purchase agreement directly to the buyer. We do not issue letter of intent, full corporate offer, irrevocable corporate purchase order, sales and purchase agreement to any mandate, agent, representative or third party under any circumstances. We are in a position to offer Major and non-Major procedures to qualified entities. We reserve the right to determine the classification of the buyer as an oil or energy Major.

All representatives, facilitators, agents and/or mandates must submit a provable and registered company, and are required to submit a verifiable letter of authorization on the letterhead of the principals, two forms of photo identification and buyer's company profile prior to any communication with our company. The buyer's company profile and letter of authorization must contain full contact information of the principals including the physical location, land line, fax and email address attached to the company's website (PO Box, mobile number, generic email address are not acceptable). Submitted documents will be forwarded to the buyer for verification of authenticity and legitimacy.

Depending on the type of transaction, market and financial position of FuelEnex, we can operate under any of the following scenarios:

1. FuelEnex purchases the fuels outright with its own funds thus taking possession of title.
2. The company enters into Joint Venture Agreements with Hedge Funds for the acquisition of the fuel and title.
3. A Joint Venture Agreement is engaged with the Seller of the fuel
4. The Buyer belonging to FuelEnex will enter into a Joint Venture Agreement for the purchase of the fuel.
5. FuelEnex acts as a primary Facilitator between the Buyer and the Seller.

In either case, the sole purpose of the company is to market the fuel thus guaranteeing the supply to the buyer(s).
