

PLANNED PREVENTATIVE MAINTENANCE · RESTAURANTS, PUBS & BARS

Keep the kitchen running. Keep the covers coming.

When the fryer dies on a Friday night, you don't lose one meal — you lose the service. Our PPM packages keep your catering equipment, refrigeration, gas and electrics serviced, certified and running, with one number to call when something does go wrong.

Lost covers

A single fridge or fryer failure can close a section for the night.

Compliance pressure

EHO visits, gas safety and interlock records all need to be current.

Too many contractors

Separate firms for gas, fridges, electrics and extract — and nobody owns the problem.

Choose your level of cover — Bronze, Silver or Gold
