At least 10 more detectors in use

Your text has a moderate likelihood of being written by AI

The nature of AI-generated content is changing constantly. As such, these results should not be used to punish students. While we build more robust models for GPTZero, we recommend that educators take these results as one of many pieces in a holistic assessment of student work. See our FAQ for more information.

GPTZero Model Version: 2023-06-30

Detection of AI-Generated Content: Colleges may employ advanced AI detection software to identify machine-generated essays.

Document ABC

Low risk of plagiarism

We have not detected any significant similarities. However, your writing may still contain plagiarism from sources outside our databases, like your previous assignments, a friend's paper, or articles behind a paywall.

Stats

Average Perplexity Score: 92.833

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 73.890

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, *"Loss of Individual Tonality and Voice: ChatGPT cannot accurately mimic your tonality and voice, resulting in an essay that sounds mechanical."*, **has a perplexity of: 262**
