Polecam

The ultimate 'ready-to-go' deployable camera solution

Polecam

The Sharp Focus Video Polecam is an ultra-reliable, rapid deployment video surveillance camera provide an integrated wireless video surveillance solution with a choice of built-in 4G or 5G network transmission.

The SFV Polecam camera delivers high quality video, even over low bandwidth, to provide an integrated wireless video surveillance solution.

Designed to take rapid deployment surveillance to the next level, the Polecam exemplifies Vemotion's 'plug & play' philosophy. Insert any data SIM card (cellular version), add power and it's ready to go.

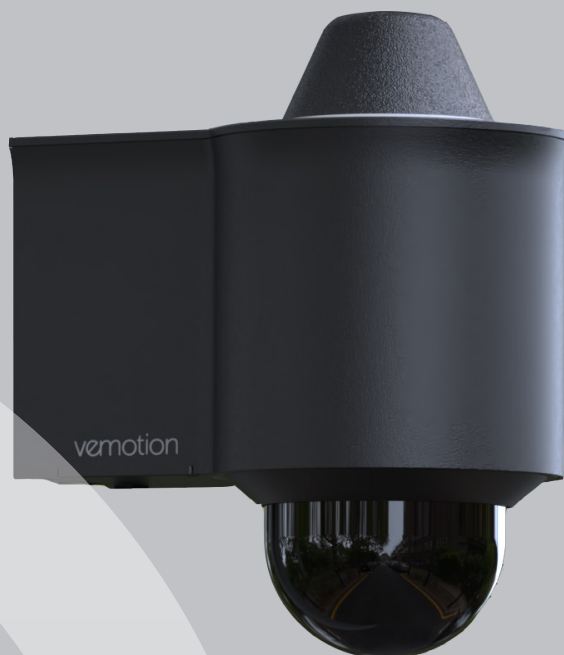

While perfect for fixed permanent deployment, the Polecam is also ideal for any situation where rapid deployment visual surveillance is required.

SFV recognises that a rapid deployment camera solution needs to be up and running with minimal effort. Its single person setup, together with high level durability and rugged weatherproof construction means it can be installed anywhere. And, wherever it's taken, it connects the moment it is switched on.

The Polecam features 2 x full HD video streams and has a 23x optical zoom, along with continuous 360-degree PTZ and day night capability. All the usual camera features can be controlled remotely via the Vemotion intelligent software or industry standard VMS platforms.

The Polecam makes use of Vemotion powered optimised video compression and unique, ultra-low latency transmission technology, which is fully encrypted and secure. This further differentiates the Polecam within the marketplace, while delivering ease of use and reliable performance.

All Vemotion powered wireless video transmission products are designed to be 'plug & play', to be highly reliable, and to offer complete control of the bandwidth used. Also, they work without the need for any specialist SIM cards or expensive airtime contracts, keeping usage costs to a minimum.

Polecam Specification:

Camera

Zoom:	5~117mm, 23x Optical Zoom
Max image resolution:	1920 x 1080
Min illumination:	Colour: 0.002 lux F1.2 Colour: 0.005 lux F1.5
Min sensitivity Mono:	0 lux with IR on
Signal to noise ratio:	>55dB
Number of Pre-sets:	300
Tours:	8 Tours, up to 48 presets per Tour
Privacy masking:	8 masks

Mechanical / Environmental

Dimensions:	L350mm H300mm D280mm
Weight:	6.5kg
Operating Temperature:	-20c to 50c
Recording Capability:	Yes
Storage Capacity:	2TB (upgradable to 8TB)

System

2 live output streams
Nano SIM
SD Card
Removable HDD/SSD

Electrical / Power Supply

Power input: 240v or 12v on request

Control integration

ONVIF support
Bespoke IP integration from industry
leading VMS platforms

Warranty

1 year
