

Back to the
“Virgin Birth.”

*“What need we any further witness,
for we ourselves have heard OF HIS OWN MOUTH”*

Lu 22:71

A FOURTH WITNESS

There is still that one big problem; there are many things that are ESTABLISHED. Like the shroud of Turin was ESTABLISHED a fake. Knowing this, people still believe in it. You’ve just SEEN three **WITNESSES** pin point “this day”, that in the history of mankind will never happen again. Even with all this proof, I bet you would still want to SEE it "**Written in Stone.**"

*"And of Zion it shall be said, **THIS and THAT** man was born in her:
and the highest himself shall establish her"*

Ps 87:5-6

The GREAT PYRAMID was built at Yahweh's command to be a testament in stone {Isaiah 19:19}. Inside the pyramid is a 6000 year calendar that ends in A.D. 2000. It records every year of human history since the creation of Adam to the second coming.
<http://www.dccsa.com/greatjoy/chris.html>

“God has set signs and wonders in the land of Egypt, to this day.”
Jer.32:20

THE WITNESSES IN STONE

Are the Pyramids in the Bible?

“Moreover he set up seven pyramids one against another”

1.Maccabees Chap.XIII :28
1611 Edition, KJV

It also reads “**seven pyramids**” in 1950 Catholic Press Inc. Bible.
I wonder why it was ok all the way up to then, and not now?

There are seven pyramids at Giza plateau.

The Great Pyramid

SIGN & WITNESSES IN STONE

“in that day shall there be an altar to the LORD in the CENTER OF THE EARTH, in Egypt, and a stone sentinel thereof to the LORD. And it shall be for a SIGN AND for a WITNESS”

Isa 19:19-20

The Pyramid is located at the exact center of the Earth's land mass. Something not known until modern man had the ability to establish it. What is interesting is almost every religion has the center of the world as the cradle of life, "heavenly mountain," or "the navel of the earth," Mount **Gerizim** in Hebrew Bible (Jgs. 9:37). Zion is to occupy this location too.

The Encyclopedia of Religion

CENTER OF THE WORLD. The importance of the symbolism of the center of the world can hardly be overstated, for it establishes the order of the universe, drawing together the spiritual destiny of collective humankind and that of the individual human being. The term *center of the world* refers to that place where all essential modes of being come together; where communication and even passage among them is possible. The center of the world is the heart of reality, where the real is fully manifest. The nature of this manifestation may vary greatly from one culture to another, taking the form of a vague, undefined power or of the direct appearance of a divinity. Since this center stands apart as the extraordinary place where the real is integral, it is always a sacred place, qualitatively different from mundane space. In the religious world view, every ordered and habitable area possesses such a center, a space that is sacred above all others. For this reason, the center of the world should not be portrayed in purely geometric terms or forms. It is because the center of the world is defined by its special relationship to the sacred that there can be multiple centers in any cosmos or microcosm. Cultures in Mesopotamia, India, and China, for example, saw no inconsistency in recognizing a large number of sacred places, each one called "the center of the world." The center of the world is a locus in mythic geography, a symbolic portrayal of the real, known, and essential aspects of the world, rather than a detached and objective reckoning of abstract space.

Below is a link to The Encyclopedia of Religion, CENTER OF THE WORLD. It's an interesting read.

http://www.lawrenceesullivan.com/Articles/Articles/Finished%20Articles/Encyclopedia_of_Religion--Center%20of%20the%20World.rtf.

<http://greatpyramid.org/aip/gr-pyr1.htm>

An interesting occurrence of gematria also helps pinpoint the Great Pyramid as God's special revelation. Here is the Hebrew of the Pyramid text, Isaiah 19:19, 20:

The Hebrew of Isaiah 19:19,20

Gematria is the science of finding meaning in the numerical value of words. In the Hebrew language each individual letter has a numerical value. Thus every word has the numerical value of the sum of the value of its letters. If one adds up the numerical value of all the Hebrew characters in the Great Pyramid text the value is 5449. This is the height in inches of the Great Pyramid!

All through history the Great Pyramid and its prophecy have been examined in many ways. There are several Great Pyramid theories, from holding the secrets of mankind to the keys of biblical prophecy. Some say it holds the key of David, the house of God, the Bible in stone, a prophetic calendar; while others believe it's a star gate. A number of people think it is the key to Revelations of St. John and that the Great Pyramid was designed to reveal the true Messiah. Who knows? The one certainty the Pyramid has proven, its builders possessed technology that still remains unmatched, even with today's so-called "advanced technology."

DISTINCTION OF TZADDIK-YESOD AMONG THE LOWER SEVEN SEPHIROT

<http://www.yashanet.com/studies/revstudy/rev5h.htm>

Soncino Zohar, Bereshith, Section 1, Page 231b – R. Jose discoursed on the verse: *Whereupon were the foundations thereof fastened ? (Job XXXVIII, 6). He said: ‘When God created the world, He established it on seven pillars, but upon what those pillars rest no one may know, since it is a recondite and inscrutable mystery. The world did not come into being until God took a certain stone, which is called the “foundation stone”, and cast it into the abyss so that it held fast there, and from it the world was planted. This is the central point of the universe, and on this point stands the **holy of holies**. This is the stone referred to in the verses, “Who laid the corner-stone thereof” (Ibid. 6), “the stone of testing, the precious corner-stone” (Is. XXVIII, 16), and “the stone that the builders despise became the head of the corner” (Ps. CXVIII, 22). This stone is compounded of fire, water, and air, and rests on the abyss. Sometimes water flows from it and fills the deep. This stone is set as a sign in the*

centre of the world. It is referred to in the words, “And Jacob took a stone and set it as a pillar” (Gen. XXXI, 45). Not that he took this stone, which was created from the beginning, but he established it above and below, by making there a “house of God”. This stone has on it seven eyes, as it is written, “On one stone seven eyes” (Zech. III, 9), and it is called “foundation stone”, for one thing because the world was planted from it, and for another because God set it as a source of blessing to the world.

“That this may be a **SIGN** among you,
that when your children ask their fathers in time to come,
saying, What mean ye by these **STONES**?”

Jos 4:6

Below are other's views of the Great Pyramid.

The Great Pyramid

Smyth, Charles Piazzi, Originally
published 1880 as *Our Inheritance in the Great Pyramid* Page 586

The Measurement of the Great Pyramid in the Revelation of St. John the Divine.

But the world is not yet *historically* arrived in the Ante - chamber and its granite parts of the great Pyramid,-- we are still in the year 1879 A.D., on the great step, and not yet out of the Grand Gallery. That step exhibits the standards of linear measure of Great Britain and Israel conjoined, but there is no reference *there* as yet, to Judah. And it is apparently to this very time, under the ominously impending South wall long *after* the Apocalyptic sixth trumpet has sounded and produced its earlier historical effects to the very letter, see Chapters VI. and VII. ; long also after the Angel of the Reformation has appeared with the open book, his left foot on the southern Papal earth, his right foot on the sea, or the islands of Northern Protestant faith, and looking necessarily Westward towards America; and long after the rise of the Gospel churches bearing the message of salvation to kings and nations and peoples, for the love of the Gospel alone, but before the seventh and final trumpet begins to sound,--**just to that very instant it is**, that the 11th chapter of the Revelation of St. John the Divine addresses itself; and opens so uniquely and appropriately with the Pyramidal mensuration idea:--“And there was given me a reed like unto a rod (measuring-rod): and the angel stood, saying, Rise, and measure the temple of God, and the altar, and them that worship therein.”

At the present epoch of history there need be no pretence among men, that they do not know what they are called on here to measure; for the Great Pyramid is the only remaining piece of architecture, temple, structure, or building prepared according to designs imparted by Divine inspiration, in visible existence; and therefore the only one of such most notable edifices capable of being now measured. And it has, teste every page of the present book, on being recently measured with something approaching to accuracy, proved by these very measures that superhuman wisdom in high science, more than 4,000 years in advance of all mankind at the time, and in its chief results not surpassed yet,--as well as fraught with religious associations of both the Old, and New, Testaments—must have presided at its arrangement and prophetic construction. And them that worship therein”; the command is likewise to measure them. But who are they, and how are they to be measured? This was a point that specially pressed upon Mr. Charles Horner, until he was **enabled to remember**, that at this present time, when the nature of the command is first perceived,--Christian history having reached the great step at the end of the Grand Gallery, it is there, and there alone, that measurement has to be performed.

The book originally published 1880, states: "... –in that primitive age it was announced that the day would come, when of the multiplication of books there should be know end,--when knowledge should be wonderfully increased, and men run to and fro over the earth,..” .

Sound familiar (<http://www>). I wonder where this was announced in that primitive age?

“But thou, O Daniel, shut up the words, and seal the book, even to the time of the end: many shall run to and fro, and knowledge shall be increased.”

Da 12:4

I thought this was an interesting picture from ALCHEMY & MYSTICISM Alexander rood 1996

LIFE AND TEACHING OF THE MASTERS OF THE FAR EAST
VOLUME III, by Baird T. Spalding, De Vorss & Co., Publishers

“When man accepts his true heritage, Christ, and the fact that the Christ of God is his true self in full dominion, the crown or capstone will be placed; then will it stand as an everlasting witness to the fact that man will never again wander from the fold.”

“The Great Pyramid is a Bible in stone, an indestructible bibliographical record portraying events of attainments and wanderings of ‘God’s chosen peoples. This does not mean just one people, but all people who accept the Christ light. Neither does it give those people license to act and be, less than Christian-like. It stands as a witness, lest humanity or its units wander away and forget, and dim this true Light, that from their midst would come forth One who had the determination fully to portray the Christ and with torch held high, aflame with light, would lead as the Christ within should lead.

"For instruction shall come forth from Zion"

Isa 2:3

I enjoyed seeing this:

Bible Students Online Food for Thinking Christians

A Bible in Stone

A recent article in the New York Times notes that for years mystics have tried to find the answers of the universe in the Great Pyramid of Giza.¹ While the Great Pyramid has not revealed any great cosmological constant, it confirms the Bible's answers to mankind's most important questions.

Why the Great Pyramid of Giza?

Why would we look for answers to mankind's important questions in some pile of rocks constructed thousands of years ago? We turn to an interesting text found in Isaiah 19:19, 20, for the answer.

"In that day shall there be an altar to the Lord in the midst of the land of Egypt, and a pillar at the border thereof to the Lord. And it shall be for a sign and for a witness unto the Lord of hosts in the land of Egypt."

How is it possible for something to be in the middle and also at the border? We find our first clue by realizing that this "pillar" for a witness is located in Egypt near the town of Giza--Arabic for "border."

Henry Mitchell, Chief Hydrographer of the United States Coast Survey, discovered an additional clue to this riddle while working on a report for the Suez Canal in 1868.² While scribing an arc around the Nile Delta on a map, he at first noticed that his center point was the pyramids of Giza. He wrote, "Subsequently I plotted the great pyramid... and found my previous result confirmed." This remarkable feature led him to further write:

"Situated upon the last rock that confines the floods of the Nile, this structure [The Great Pyramid] occupies a more important physical position than any other artificial object upon the face of the earth, since it is the centre from which radiated the waters of the river, and from which, from age to age, the coast may be supposed to have advanced in concentric arcs."

Mitchell was amazed how this structure perfectly marked the border of Upper and Lower Egypt.

Who Built the Great Pyramid and Why?

Of the seven ancient wonders of the world, the Great Pyramid of Giza alone has survived the ravages of time. Because of its immense size along with the fact that it is the oldest chambered building in the world, it has been universally recognized as standing preeminent among the wonders.

Many theories have been advocated as to the purpose of the Great Pyramid. The most popular theory is that it was a gigantic tomb for an ancient pharaoh. Indeed, most pyramids

were built as tombs. However, there is abundant proof that the Great Pyramid is unique and was not intended as a tomb. Just as instructions were given to Noah for the building of the ark, and to Moses for the assembling of the Tabernacle, we submit that God gave instructions for the construction of the Pyramid that it might testify in the last days as to His infinite wisdom and foreknowledge.

The concept that the Great Pyramid was erected for this purpose is not new. It first came into prominence in 1860 by English publisher, John Taylor. What convinced him were primarily the many important scientific truths embodied in the measurements and angles of this wonderful structure.

Who Built the Great Pyramid and Why?

Of the seven ancient wonders of the world, the Great Pyramid of Giza alone has survived the ravages of time. Because of its immense size along with the fact that it is the oldest chambered building in the world, it has been universally recognized as standing preeminent among the wonders.

Many theories have been advocated as to the purpose of the Great Pyramid. The most popular theory is that it was a gigantic tomb for an ancient pharaoh. Indeed, most pyramids were built as tombs. However, there is abundant proof that the Great Pyramid is unique and was not intended as a tomb. Just as instructions were given to Noah for the building of the ark, and to Moses for the assembling of the Tabernacle, we submit that God gave instructions for the construction of the Pyramid that it might testify in the last days as to His infinite wisdom and foreknowledge.

The concept that the Great Pyramid was erected for this purpose **is not new**. It first came into prominence in 1860 by English publisher, John Taylor. What convinced him were primarily the many important scientific truths embodied in the measurements and angles of this wonderful structure.

Taylor was assisted in his conclusions by the writings of ancient historians, Herodotus and Manetho. They recorded that Egyptians helped to build the Great Pyramid under the direction of **a shepherd king named Philitis**. Manetho, himself an Egyptian wrote: "There came up from the East, in a strange manner, men of an ignoble race, who had the confidence to invade our country, and easily subdued it by their power without a battle." These humble, peaceful invaders were styled Hyksos, that is, shepherd kings. He then related how afterwards they departed for Judea and built a city there, named Jerusalem. Another possibility is that this shepherd king was Shem, a faithful son of Noah, also known as Melchizedec, the King of Salem (peace—Jerusalem). Shem would have been alive at the time of the building of the Great Pyramid. This and other evidence points to a non-Egyptian architect and builder of the Great Pyramid, and one that was closely associated with the God of the Bible.

Astounding Scientific Facts

<http://www.biblestudents.net/studies/pyramid/bibleinstone.htm>

Food for Thinking Christians

The height of Great Pyramid 137 meters. The height of St.Peters is 136.5 meters?

A shepherd king named Philitis?

http://www.verafay.com/pyramid_4.htm

Herodotus tells us that they called the pyramids after "**PHILLITION**," a shepherd who at that time fed his flocks about the place. This "**PHILITION**," or "**PHILITIS**," appears to have been the Architect of the Great Pyramid. He was an Arabian, but went up to Philistia in Judea with those who went up, and was known in Manetho's time as "**PHILITION**," the Philistine. Who then was "**PHILITION**"? Some have identified him with Shem, others with Melchisedec, but the writer believes he was "**JOB**." Job was the greatest man in the East, or Arabia. Job. 1:3. His age (he lived to be nearly 250 years old) places him back before the days of Abraham (B. C. 2000), who lived to the age of 175 years, and locates him as living at the time when the Great Pyramid was built. And in the 38th chapter of Job,

Phil[is]tine n.

5ME < LL(Ec) *Philistinus*, usually pl. *Philistini* < LGr (**Josephus**)
philistinoi < Heb *p'lishtim*; akin to PALESTINE

The Antiquities of the Jews 1.2.3:

The sons of **Seth**. They also were the inventors of that peculiar sort of wisdom which is concerned with the heavenly bodies, and their order. And that their inventions might not be lost before they were sufficiently known, upon Adam's prediction that the world was to be destroyed at one time by the force of fire, and at another time by the violence and quantity of water, they made two pillars; the one of brick, the other of stone: they inscribed their discoveries on them both, that in case the pillar of brick should be destroyed by flood, the pillar of stone might remain, and exhibit those DISCOVERIES TO MANKIND; and also inform them that there was another pillar of brick erected by them.

*"The roaring tempest drives him, it roars like Seth.
The guardians of Heaven's parts open the doors to Heaven for him"*

Text from the pyramid of King Pepi

PALESTINE (the region) & Egypt: also known as the **HOLY LAND**

“In the same day the LORD made a covenant with Abram, saying, Unto thy seed have I given this land, from the river of Egypt unto the great river, the river Euphrates:”

Ge 15:18

The beginning of the Age of Aquarius for the Earth will be in the year 2000. This is marked, on one level, by the completion of the 6000-year Anno Lucis or "Calendar of Light" preserved within certain secret Masonic traditions. The placing of a golden capstone on the Great Pyramid in Egypt, when 1999 turns to 2000, is a symbolic gesture signaling the near completion of this 6000-year prophetic and biblical cycle. <http://www.lightnews.org/9908/three%20cosmic%20crosses.htm>

"And he wrote there upon the stones a copy of the law of Moses"

Jos 8:31-32

The Torah

"all that was, is, and will be unto the end of time is included in the Torah... and not merely in a general sense, but including the details of every species and of each person individually, and the most minute details of everything that happened to him from the day of his birth until his death."

The Vilna Gaon, an 18th century Rabbi

Edgar Cayce: about the Great Pyramid?

"...these run from specific days; for, as has been seen, there are periods when even the hour, day, year, place, country, nation, town, and individuals are pointed out. That's how correct are many of those prophecies as made... As is indicated in that period where entrance is shown to be in that land that was set apart, as that promised to that peculiar peoples, as were rejected - as is shown in that portion when there is the turning back from the raising up of Xerxes as the deliverer from an unknown tongue or land, and again is there seen that this occurs in the entrance of the Messiah in this period - 1998.

*“And of **Zion** it shall be said, **THIS** and **THAT** MAN WAS BORN IN HER:
and the highest himself shall establish her.”*

Ps 87:5

CHAPTER II

THE GREAT PYRAMID, THE MYSTICAL WONDER

<http://www.nephos.com/hcII.htm>

While theologians generally hesitate to set definite dates for the fulfillment of prophecies unless so indicated, there are usually relevant factors which computed algebraically or by calculus will indicate approximate time and place of predicted events. The Pyramid is a complex composite of such data coupled with measurements, symbols and numerics, and numerous authorities believe that it represents a physical symbolism in stone of the Creator's Plan for the salvation and exaltation of mankind.¹⁹ It thus gives meaning to man's relation to the Universes...

...Conformity will apply mentally, physically, and spiritually. The cubical content of the unusual Anteroom is 365,000 cubic inches, approximately, which divided by the days in the year points to a 1000 year millennial period beginning about 2000 A.D. ...

SYMBOLISM AND COINCIDENCES OF THE GREAT PYRAMID

by Tim G. Hunkler

This web topic presents a summary of the various geometric, geophysical, astronomical, numerical, and prophetic interpretations made by explorers, authors, and visitors to the Great Pyramid over the last 200+ years. These interpretations run the range of believability from topics such as the Great Pyramid having been used as a sundial, to the calculation of the speed of light, to the prediction of the exact dates of the birth of Adam, the Exodus, and the birth, baptism, and crucifixion of Jesus.

Let me state my personal belief that I tend to agree with a number of pyramid and pyramidology authors that if you look at the sum total of all of the possible symbolisms encoded in the Great Pyramid, that even if only 10% of this information was truly intended, that even this 10% is beyond a coincidence. Therefore, to accomplish the simultaneous design goals achieved by the Great Pyramid would require the ability to modify the size and shape of the earth, the position of planets, and even the solar system. In short, this would require divine powers and therefore the existence of the Great Pyramid implies that God exists. Having said this, this is about all the personal opinion of mine you'll find on this web page. The remaining information is not my own, but merely the collection of pieces of information from the works of others who I hope I have fairly credited. The collection of this data has been multi-year project. I hope you find some value in this information collection.

http://www.hunkler.com/pyramids/pyramid_symbolism.html#miscel

***"...it known unto the king that we went into the province of
Judea, to the house of the great God, which is BUILDED WITH
GREAT STONES,"***

Ezr 5:8

SEE Isa 19:17

There is only **one** universal language, math. I think even our feeble minds understand that. It's the only thing that can be verified by all. Even by those stars in heaven. If you look, then you

might start to SEE the "Bible in Stone," and more.

*" And Sion shall come, and shall be shewed to all men,
being prepared and builded, like as thou sawest the hill
graven without hands"*

2Esdr13:36

One of the most absurd views in the history of mankind is that the builders of the most supreme structure on this planet could not have the brains to make a wheel. What's that say about us?

Edgar Cayce

Edgar Cayce, when he was asked this question:

Q. How was this particular Great Pyramid of Gizeh built?

A. By the use of **those "FORCES IN NATURE"** as make for iron to swim. Stone float in **the same manner.** (5748-6)

Let's SEE if he is right?

THE CLUES

The sides were aligned exactly with the points of a compass, so accurate that compass errors can be checked against them. All tools were made of **bronze** when **iron** is much harder. Also a real fine grease like mud found near by the site. Some experts believe a fine mud which was found, was put on the parallel wood rails they found to slide the blocks from the quarries to the pyramid location.

The Substantial Nature of Magnetism

by **H. P. Blavatsky**

...this leading and paramount demonstration, we select what no scientist on earth will question as a representative **NATURAL FORCE or so-called form of energy - namely, magnetism**. This force, from the very simple and direct manifestation of its phenomena in displacing ponderable bodies at a distance from the magnet, and without having any tangible substance connecting the magnet therewith,

is selected for our purpose, since it has well proved the champion physical puzzle to modern mode-of-motion philosophers, both in this country and in Europe.

<http://www.theosophical.ca/Magnetism.htm>

The Seventh Book of Natural Magick

John Baptist Porta

“The Wonders of the Loadstone”
Chapter XXVII

“How the Loadstone can hang up Iron in the air.”

I have a long time endeavored much to make Iron hang in the air, and not touch the Loadstone, nor yet tied beneath it. And now I think it almost impossible to be done. Pliny says it. Dinocrates the Architect began to vault the Temple of Arsinoe with Loadstone, that therein her image of **Iron** might seem to hang in the air....

<http://members.tscnet.com/pages/omard1/jportac7.html#bk7I>

Magnetism: one of the fundamental *forces of nature*.

Loadstone: a hard, black magnetic stone was first discovered in **Asia Minor** by a shepherd.
(The World Book Encyclopedia)

“And the house, when it was in building, was built of stone made ready before it was brought thither: so that there was neither hammer nor axe nor any tool of IRON heard in the house, while it was in building.”

1Ki 6:7

The Moving and Placement of the Blocks

Magnets can hold over 400 times their own weight. That means you could hold a two ton block levitating in the air with 8 pounds of magnets beneath it and a repelling threepound magnet on the ground. A 20 ton block would take about 100 pounds of magnets to levitate, a five year old could push it. Want to raise it? Just increase the magnets under it or elevate the lower magnet. Why were the tools found by the pyramid either bronze or wood, when iron is much harder? It would have been impossible to work around magnets with iron tools. A compass is a magnet, the blocks would be aligned exactly with the points of a compass, if they were levitating in the air on a big compass. How about Stonehenge, where a high level of magnetism is found in the ground?

**We should give Edgar Cayce at least two points for that one.
He will get many, many more as time goes on.**

Most scholars in the past believed that the stones of the pyramid were cut to precision by the hands of farmers because they only worked on pyramid when the Nile flooded. I don't think it was possible to cut millions of stones with this precision using hand tools. I would like to see someone cut one stone by hand with this precision using those hand tools.

*“And in the cutting of stones, to set them, and in carving of wood,
to make any manner of **cunning** work”*

Ex 35:33

Cunning [Now Rare] clever proficiency; skill

Cutting the blocks

A coarse material like sand with water pressure, similar to the way it would be done today with precision using a water-jet, this method would also leave a fine mud?

*“Forasmuch as thou sawest that the stone was cut out of the mountain
without hands,
and that it brake in pieces the iron, the brass, the clay, the silver, and the
gold; the great God hath made known to the king what shall come to
pass hereafter:
and the dream is certain, and the interpretation thereof sure.”*

Da 2:45

*“And I looked and saw that he **carved** out for himself a great
mountain, and flew up on to it.
**AND I TRIED TO SEE THE REGION OR PLACE FROM WHICH
THE MOUNTAIN WAS CARVED, BUT I COULD NOT.”***

2 Esdras13:6-7
