

The Concept of God?

The information about how to build the pyramid, along with other information, was sent to Nova in early 1997. After reviewing the information, Nova's contact informed me that they had verified the information. When asked if Nova would expose their findings, his reply was no. Questioning why, I was told there was a meeting, which concluded with not exposing their analysis because the findings were too controversial and could change the concept of God.

What was believed about the Great Pyramid?

Below are some views of others:

Today, it is believed by those who allow science to invade the great study of Ancient Egypt, that the pyramid is not to have been a tomb but, in some way to have been a star gate, a means of projecting the Pharaoh to his divine progenitors. http://www.angelfire.com/zine/childrenhelping/new_page_6.htm

...Five of the 7 brightest stars have pyramid equivalents: The 3 great pyramids of Khufu, Khafra, and Menkaura for the belt of Orion, the pyramid of Nebka at Abu Rawash corresponds to the star Saiph, the pyramid at Zawat al Aryan corresponds to the star Bellatrix. The only two missing star positions are for Betelgeuse and Rigel.

Of the three pyramids, Cheops is the most significant because it contains a portal. In a fictionalized account of this, the movie *Stargate*, the portal links from the pyramid to some far planet. <http://www.crystalinks.com/gpstats.html>

.....In the northeast corner of the little ship stood a desk on which there were thirty-two tablets of a heavy-quality paper, rather dark in color. It looked like papyrus, the parchment paper used by the people of olden times to record important data. They were about eighteen inches across, when open. I had expected to see some ancient language or symbols recorded on these parchments, but imagine my surprise when I found the events of the past, present and future there described in modern day English, in black ink and written in a beautiful longhand. As I leafed through them, I noticed that the pages seemed to be sewn together. Strangely enough, the records were not musty or even dusty, yet the room was not a vacuum. We could breathe easily, although there was no indication of a source of air.

The tablets told of events of the past from the beginning of the world to **1958**. From **1958**, they stated, there would be development of an unusual nature in many ways, until **1998**. That period would be a "preparation for the coming of the Master." The end of this present Earth cycle, it was indicated, will be **1998**.

Mr. X went on to tell us that there were other records buried in different underground areas that have never yet been revealed, and which pertain to the time beyond **1998**. I learned, also, that there was another door leading from the room in which the Spaceship stood, but Mr. X didn't say when it would be opened---or by whom.

<http://friendpages.com/cgi-bin/public/pages/cover.cgi?pageid=greatpyramid>

Edgar Cayce

My main focus in the above excerpt was *“The builders of the Great Pyramid buried one of their great space ships near the structure. It will be revealed---no doubt within a comparatively short time---that there are many secret chambers within the Great Pyramid”*. The reason I added more is that something looked familiar.

“As to changes physical again:..... And these will begin in those **periods 58 to 98** when these will be proclaimed as the periods when His Light will be seen again in the clouds.”

(Q) How was this particular Great Pyramid of Gizeh built? (A) By the use of those forces in nature as make for iron to swim. Stone floats in the air in the same manner. **This will be discovered in '58.”**

...as the deliverer from an unknown tongue or land, and again is there seen that this occurs in **the entrance of the Messiah in this period - 1998.”**

“For the man was above forty years old, on whom this miracle of healing was shewed.”

Ac 4:22

Forty years in the wilderness?

“And she brought forth a man child”

Man 730. arrhen, probably from 142; male (as stronger for lifting):--male, man.

Child 5207. huios, apparently a primary word; a "son"

Not: a male child _ 3495. ; a youth (**under forty**):--young man.

Could Isa 7:14 occurred between Sept. 1998 and Sept. 1999?

“....the entrance of the Messiah in this period – 1998.” - Edgar Cayce

The Great Pyramid still holds the same beliefs.

“The King would depart to the sky and join Osiris.”

*"The roaring tempest drives him, it roars like **Seth**.
The guardians of Heaven's parts open the doors to Heaven for him"*

Text from the pyramid of King Pepi

*“The pharaoh seeks to fly up to heaven and join God using the pyramid as the
Stairway to Heaven.”*

**The ancients make the Great Pyramid out to be some
kind of quantum teleportation device, Star Gate ?**

Until we are able to understand how and why the marvels of the past were created we cannot underestimate or limit the builder's knowledge and technology. Here is a perfect example: In 1936 near Baghdad, a mystifying artifact was discovered. An electric battery over 1,800 years before its modern invention in 1799. It took us over 1,800 years to create the same knowledge. Maybe our technology needs to catch up to the builders before we are able to comprehend their wisdom. It would be like finding a pre-Christian battery in the year 1790. We wouldn't have a clue as to what it was, much less how it was used. We had to wait until our technology reached at least the same level in 1799 before we had any chance to comprehend what a battery was. It wasn't that long ago when the earth was flat. Fifty years ago walking on the Moon was sic-fi. I remember watching a program that was attempting to

discover how the ancients were capable of working inside the tombs without torches, since there was no evidence of smoke on the ceilings. I think the best attempt was using mirrors. But they said that they didn't have the knowledge to make a mirror? Below is a ancient hieroglyphic called the Crook's Tube.

Pyramids

Magnetism, an aspect of electromagnetism, one of the fundamental forces of nature. Magnetic forces are produced by the motion of charged particles such as electrons, indicating the close relationship between electricity and magnetism. (Funk & Wagnalls) What if the blocks on the "Crook's Tube" were magnets? I would guess if they are magnets, they could levitate 25 to 30 tons. That's a lot of energy. Instead of using electricity to make a magnet, could it work in reverse? It seems that we would have been given the means to create energy without polluting the world. Experimenting in the garage, compressing small magnets on a copper-like rod caused the meter to move, maybe I was seeing things.

The prophecies of both Zion and the Great Pyramid
are said to reveal how mankind came to be.

Star Gate?

Is today's knowledge and technology capable of comprehending such an
achievement?

By MALCOLM RITTER
AP Science Writer

12-11-1997

Science fact: Scientists achieve 'Star Trek'-like feat

NEW YORK (AP) Scientists have pulled off a startling trick that looks like the "Beam-me-up-Scotty" technology of science fiction. In an Austrian laboratory, scientists destroyed bits of light in one place and made perfect replicas appear about three feet away. They did that by transferring information about a crucial

physical characteristic of the original light bits, called photons. The information was picked up by other photons, which took on that characteristic and so became replicas of the originals. The phenomenon that made it happen is so bizarre that even Albert Einstein didn't believe in it. He called it spooky. In addition to raising the rather fantastic notion of a new means of transportation, the trick could lead to ultra-fast computers. The experiment is reported in Thursday's issue of the journal Nature by Anton Zeilinger and colleagues at the University of Innsbruck in Austria. Another research team, based in Rome, has done similar work and submitted its report to another journal. The work is the first to demonstrate "**quantum teleportation**," a bizarre shifting of physical characteristics between nature's tiniest particles, no matter how far apart they are. Scientists might be able to achieve teleportation between atoms within a few years and molecules within a decade or so, Zeilinger said.

The underlying principle is fundamentally different from the "Star Trek" process of beaming people around, but could teleportation be used on people? Could scientists extract information from every tiny particle in a person, transfer it to a bunch of particles elsewhere, and assemble those particles into an exact replica of the person?

There's no theoretical problem with that, several experts said. But get real. "I think it's quite clear that anything approximating teleportation of complex living beings, even bacteria, is so far away technologically that it's not really worth thinking about it," said IBM physicist Charles H. Bennett. He and other physicists proposed quantum teleportation in 1993....

It looks like today's knowledge and technology is semi-capable of comprehending the possibility of a Star Gate.

Experimental quantum teleportation. -plasma laser-driven

So if the Great Pyramid was some type of star gate, it would probably be some type of laser?

Two Key elements for a laser are "Magnetism" & "Vacuum."

Below are some more views of others about the Great Pyramid.

VOLODYMYR KRASNOHOLOVETS and ASSOCIATES

<http://www.gizapyramid.com/DrV-article.htm>

This research was sent to me in January of this year by Dr. Volodymyr Krasnoholovets, one of the top theoretical physicists at the Institute of Physics in the Ukraine. This article contains the research that was carried out in Russian pyramids built during the last 10 years by Alexander Golod from Moscow. This article was sent to me to be posted exclusively on our web site. We thank Dr. Krasnoholovets and his associates for giving us the honor of releasing this research to the West.

ON THE WAY TO DISCLOSING THE MYSTERIOUS POWER OF THE GREAT PYRAMID

The Great Pyramid of Giza, as the first miracle of antiquity, continues to excite our curiosity. Although a number of secrets have already been disclosed, the idea that the great miracle still hides its mystery involuntary occurs to someone when he or she looks at the gigantic monument. The Great Pyramid raises many questions...

...Meanwhile, studying the Great Pyramid of Giza might bring about a major breakthrough in both fundamental science and the universal thinking of the human community. In fact, everyone knows about the Great Pyramid and admires the deep technological expertise of ancient builders. All of us will be pleased to learn about the knowledge of ancient architects. Consequently, if we would confirm once again our results this time inside the Great Pyramid, this will help to us to convince the non-believers. Namely, we will prove that the Great Pyramid is actually filled with inerton waves and hence one of its functions is to be a resonator of inerton waves, which are excited by the Earth in the world space net (or world aether, if you want). Thus, we will demonstrate that over 4,500 years ago people already possessed the knowledge, which we re-discover today. The proof will allow the immediate corollary that their knowledge about the submicroscopic construction of Nature much exceeded the attainments of modern official science. In such a manner, **the Great Pyramid, House of Nature** will give us a unique chance to launch radical changes in our views on the nature of things, advance the frontier of thorough knowledge and therefore will promote the regulation of links aimed at harmonious peaceful co-existence.

(There is a lot more to this site, below is the summary)

SUMMARY

Unusual influence of the Great Pyramid on animate and inanimate objects of nature may be associated with a special field in the Pyramid. It turns out that the Great Pyramid may have been built as a resonator of that field. In my recent research, the field was called "inerton" since it arises from a submicroscopic **quantum** consideration of a moving elementary particle in the structure of real space in which the motion occurs. In essence, the inerton field is generated due to friction of a moving particle by the space treated as a quantum substrate, or aether. From the mathematical point of view the substrate may be simulated as a mathematical space that is densely packed by its building blocks - elastic cells. Any particle is also an element of the space. Then when we treat any material object, we should take into account that it is embedded in the space substrate that possesses its own properties and is able to interact with massive objects. For instance, you may imagine a metallic framework, which is placed in a room filled with air. You know any vibration of the framework will immediately be passed to the air and the latter will vibrate as well; in its turn any vibrations of the air will excite the corresponding vibrations in the framework. The same happens with the moving Earth as long as it fits into the space substrate. Atoms of the Earth vibrate and interact with the space generating inerton waves both in the space substrate that contained the terrestrial globe and in the surrounding Earth. We may distinguish two constant flows of inerton waves of the Earth. The flows are caused by the proper rotation of our planet from the West to East and its motion along the orbit around the Sun. Paths passed by the fronts of these two flows are characterized by ratio $\pi/2$. So an object whose dimensions satisfy ratio $\pi/2$ and the orientation coincides with the quarters of the world to be a resonator of inerton waves of the Earth. Using the scanning electron microscope, we studied changes in the surface of metal specimens, which stayed in a small resonator for some time. The fine structure of specimens stayed in the resonator were smoothed noticeably. Thus the presence of inerton field in the small resonator was proved experimentally. Besides the inerton field manifested itself also in other experiments. In particular, it makes clusterization of hydrogen atoms in the $\text{KIO}_3 \cdot \text{HIO}_3$ crystal, affords the anomalous photoelectric effect both in rare gases and the surface of metal, etc. In such a manner, the existence of the inerton field may be taken as proved. And this means that general relativity loses its monopoly rights of the all-embracing theory: the static relativity should be replaced for a dynamic theory based on the inerton field that realizes the direct interaction between massive objects.

Summarizing we may infer that the inerton field, a new physical field, which as fundamental as the electromagnetic one may well have been known by the architects of the Great Pyramid. They built the Great Pyramid as the House that was saturated with inerton waves.

Submicroscopic Deterministic Quantum Mechanics

Authors: [Volodymyr Krasnoholovets](#)

Examples of megalithic sites showing a technology, which is different and sometimes superior to present construction methods. ... The **great pyramid** of Giza in Egypt incorporates 2.3 million stones of 2.5 tons each ... one has to go through the **quantum vacuum** where there is no time

[World Mysteries - The Megalith Mystery, by Rich Anders](#)

sphinx.htm

To my mind, the Great Pyramid utilised the vast power that comes from the Earths Magnetic and Electrostatic Fields, and was in fact a precision instrument that generated electricity as a by-product of its real purpose.

If it was understood by the pyramid builders that the Earth had powerful Magnetic and Electrostatic Fields, then the Great Pyramid construction could be a testimony in stone, to such an understanding. This positionally exact siting is in fact, in electrical harmony with the Magnetic and Electrostatic Fields of the Earth, and if the structure were not so aligned, it simply would not work. <http://www.geocities.com/bdfboyd/sphinx.html>

The modern day clincher would be if someone came along and designed some sort of electrical generator, that only worked, and produced electrical power when the device was aligned to the **Magnetic and Electrostatic Fields of the Earth**. This would prove the physics of it all. Such a device would deliver free power anywhere on the globe simply by setting it up correctly aligned....that the pyramid is lined up exactly with **the magnetic north pole**, a difference of only 16 minutes, or some absurdly small number like that there are 60 minutes in one degree). Coincidence? Nope ...

<http://aqaffaf.hypermart.net/Pyramids.htm>

The Pyramids on the Earth align perfectly
with the Stars in Heaven

<http://www.geocities.com/Athens/Acropolis/9150/stars.html>

THE SEARCH FOR THE REAL STARGATE

Who built the pyramids? ... The sides of the pyramids are almost perfectly equal, with its base aligned perfectly to the true north. The Pyramid complex at Giza is an almost perfect representation of the Orion's Belt, judging by placement, alignment and relative size. Also, the pyramids' position relative to the Nile is the same as the Orion's Belt's position relative to the Milky Way (A computer simulation was used to predict what the sky looked like at the time the pyramids were built). Even the value of pi (could be pure coincidence, of course) is incorporated into the pyramidal design.

And all of this from a civilization that hasn't invented the wheel yet? ... And here is another question. Could we go as far as thinking that the stargate could actually be real and the movie/show exist only as a safeguard, to discredit any leaked information? Could it be so hard to believe that the government could keep such a big secret from the public? ... They only tell us what they want us to know. It is as simple as that. So, if, hypothetically, the government found a stargate, would it inform the public? Of course, not. But we need something to back up this theory.

*"... this is none other but the house of God,
and this is the gate of heaven."
Ge 28:17*

Did anyone realize what Mark Lehner
said in the Nova interview?

“Don't opt out for lost civilizations, extraterrestrials, or hidden technologies”

opt out: to decide not

Definition

“don't opt out” Reverse dictionary results: **elect, pick, go with, elect, choose**

don't opt out: to decide in favor of

***"...decide if favor of lost
civilizations, extraterrestrials,
and hidden technologies"***

Mark Lehner

Twenty-nine years of study and research to the pyramids, Archaeologist,

"For ask now of the days that are past, which were before thee, since the day that God created man upon the earth, AND ASK FROM THE ONE SIDE OF HEAVEN UNTO THE OTHER, whether there hath been any such thing as this GREAT THING IS, or hath been heard like it?"

Deuteronomy 4:32

The Great Pyramid

Pyramids

"... and behold a ladder set up on the earth, and the top of it reached to heaven: and behold the angels of God ascending and descending on it."

Ge 28:12

Pyramids

DIAGRAM

PLASMA LASER

This laser would fit in a brief case.

*“For it came to pass, when a **beam of light** went up toward heaven from off the altar, that the angel of the LORD ascended in the **beam of light** of the altar.”*

Jg 13:20

03851. lahab, from an unused root meaning to gleam

Gleam; beam of light

SYMBOLISM AND COINCIDENCES OF THE GREAT PYRAMID

by Tim G. Hunkler

...Therefore, to accomplish the simultaneous design goals achieved by the Great Pyramid would require the ability to modify the size and shape of the earth, the position of planets, and even the solar system. In short, this would require divine powers and therefore the existence of the Great Pyramid implies that God exists...

http://www.hunkler.com/pyramids/pyramid_symbolism.html#miscel

Would proof change the concept of God?

God: n. Supreme Being

[G-] in monotheistic religions, the creator and ruler of the universe, regarded as eternal, infinite

god:1 any of various beings conceived of as supernatural, immortal

2 an image that is worshiped; idol

“For information shall come forth from Zion”

Isa 2:3

.
