

## OCTON GEOLOGICAL CONSULTANTS

### Water use license applications (WULA)

The National Water Act (NWA) was promulgated to ensure that South African water resources are protected, used, conserved, managed and controlled. This applies to all watercourses including rivers, springs, natural channels, wetlands, lakes and dams.

OCTON Geo Consultants has got a huge experience in obtaining water use licences for mining, development projects, farms and industrial firms.

#### We assist our clients with:

- Water use license applications.
- General authorisation applications.
- WUL compliance monitoring.
- Geohydrological studies
- Water balance

#### Water use licence can be for:

- Ground and surface water abstraction.
- Irrigation and storage of water.
- Wastewater treatment plants.
- Impeding or diverting water.
- Discharging of waste water into a water resource through a pipe canal sewer.

#### About us:

OCTON Geological Consultants (Pty) Ltd is a privately owned company which provide a variety of environmental, mining, and geological services such as Geotechnical Investigations, Waste Management, Environmental Management and Hydrogeology. OCTON is comprised of geologists, environmental scientists, spectral geologists, mathematicians, and engineers. The blend of skills within our company makes us ready to tackle any project with ease.
