Interesting about Muskingum University Archers

Moorehead Farm

This unique farm was donated to the University by the family of 1923 graduate and award-winning film and television actor Agnes Moorehead. Moorehead Farm is located seven miles from campus and is home to the University's cross country courses and outdoor archery ranges. The facility was inaugurated in Fall 2021. Muskingum is one of only two universities in Ohio with a dedicated cross country course and one of only several with a dedicated outdoor archery range. The cross country facility has three primary collegiate courses for 5K, 6K, and 8K races and can also configure to a 4K collegiate short course. The flexibility also allows the University to create races that meet the needs of other segments of the running community, including middle and high school. The University is the only OAC school to field an archery team and one of the only NCAA schools in Ohio to offer archery as a varsity sport. The archery ranges host the program's two outdoor seasons: 3D Outdoor and Outdoor Target. Muskingum also plans to host camps and clinics to introduce young students to the sport.
