novlok DevOps

Novlok DevOps Lite

CI/CD Simplified

Jenkins and GitLab CI for automation of development processes.

Flexibility

Compatible with various languages and platforms.

Ease of Use

Intuitive interface and simple settings, ideal for DevOps beginners.

Team Collaboration

Support for collaboration between programmers and operations teams.

Scalability

Ability to grow with the project's needs.

Novlok DevOps Standard

Integrated Monitoring

Includes Novlok Monitor Standard for complete visibility.

Problem Analysis

Tools for proactive identification and resolution of problems.

Advanced CI/CD

Robust combination of Jenkins and GitLab CI.

Detailed Insights

Dashboards and reports for a complete view of the development lifecycle.

Continuous Improvement

Tools for constant improvement of processes.

Novlok DevOps Premium

Advanced Automation with Ansible

For IT automation and configuration management.

Infrastructure as Code with CloudFormation

Modeling and management of AWS resources.

Complex Infrastructure Management

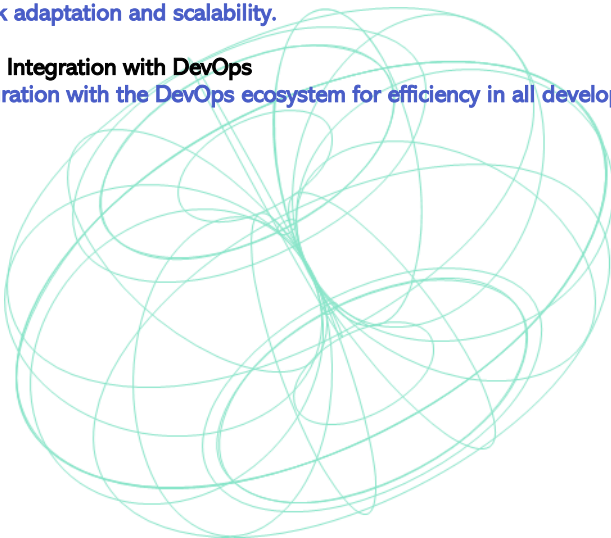

Tools for large-scale infrastructures.

High Scalability and Flexibility

Quick adaptation and scalability.

Total Integration with DevOps

Integration with the DevOps ecosystem for efficiency in all development phases.

Lite Version

Essential tools for integration and continuous delivery.

Includes

Jenkins

CI/CD process automation with a wide range of plugins to support all aspects of software development.

GitLab CI

Integrated solution for CI/CD, facilitating collaboration and automation within GitLab.

Benefits

Quick initiation into DevOps practices with reliable and well-established tools.

Flexibility to adapt to various development workflows.

Facilitates the implementation of CI/CD with reduced costs and complexity.

Standard Version

Integration of DevOps with advanced monitoring solutions .

Includes

Novlok DevOps Lite

All the features of the Lite version.

Integrated monitoring to track the performance and health of applications and infrastructure..

Benefits

Continuous monitoring to identify and quickly resolve issues.

Dashboards and advanced analytics for a detailed view of the development lifecycle.

Improvement in software quality and operational efficiency..

Premium Version

Automation and infrastructure as code for complex environments .

Includes

Novlok DevOps Standard

All the features of the Standard version.

Ansible

Powerful automation for configuration management and deployments.

CloudFormation

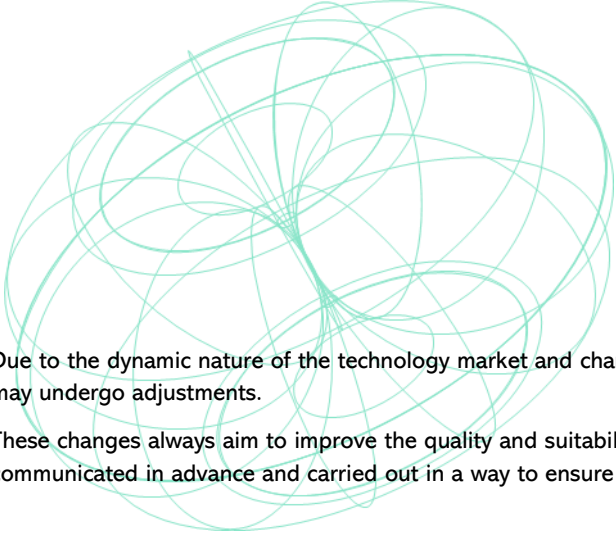

A tool for modeling and configuring AWS resources, enabling the creation and management of infrastructure as code.

Benefits

Advanced automation for IT processes and software deployment.

Efficient management of complex and multi-platform infrastructures.

Ability to scale and quickly adapt to changes, improving business agility.

Due to the dynamic nature of the technology market and changes in software licensing conditions, our portfolio of cloud-native products may undergo adjustments.

These changes always aim to improve the quality and suitability of our services to your needs. We guarantee that any changes will be communicated in advance and carried out in a way to ensure the continuity and excellence of the service.
