Novlok Monitoring & Business Intelligence

Logstash for Data Enrichment
Protection of the Elasticsearch port with data always passing first through Logstash.

Integration with IT Infrastructure
Compatibility with various data sources and easy integration with other Novlok packages.

Versatile Data Collectors (Beats)
Ability to capture a wide range of data from logs to network metrics.

Customizable Dashboards
Tools to create specific and useful visualizations for different teams.

Alarms and Notifications
Configuration of alerts to keep teams informed about critical issues.

Enhanced Security and Compliance
With Elastic Platinum features ensuring data security and compliance with regulations.

Dashboards and Advanced Analytics
Tools and support to create complex dashboards offering deeper insights.

Robust Alert System
Advanced alarm configuration ensuring a quick response to incidents and optimization of reaction time.

Advanced Business Intelligence
Integrated BI tools allow for deep data analysis, identification of trends, and real-time business insights visualization. This includes customizable BI dashboards, analytical reports, and data-driven decision support.

Predictive Analysis and Machine Learning
Use of machine learning algorithms to predict future trends, optimize processes, and identify business opportunities ahead of the competition. This enables companies to be proactive in their strategies.

Data Integration and ETL
Expanded capabilities for data integration from various sources, facilitating data transformation and enrichment (ETL) for more comprehensive and accurate analysis.

Customization and Flexibility
Extensive customization options to meet the specific BI needs of each company, allowing for the creation of solutions that perfectly adapt to various business requirements.

Novlok Monitoring & Business Intelligence package, in its three versions, is designed to meet the varied needs of monitoring and data analysis of IT infrastructures.

From the Lite version focused on basic and efficient monitoring to the Premium version offering advanced data security and detailed analysis tools, Novlok Monitoring & Business Intelligence is a comprehensive solution for companies looking to optimize the performance and security of their IT infrastructure with Business Intelligence tools.

With its ability to integrate with other Novlok packages, this package is an ideal choice for companies wanting a holistic and centralized view of the performance and security of their entire cloud infrastructure.
