- Ironically the world follows a NO-MOON System for time.
- The scripture doesn't say anything about observing the month of Tishri in the OT, much less counting backwards. The month named to start is Abib.
- Calculations are now hundreds of years in advance, but only work with rules of postponement! Scripture teaches to observe the acceptable year of Yahowah.
- Isaiah 1.14 Your new moons and your appointed ~~feasts~~ times (MOW'ED) my soul hates: they are a trouble unto me; I am weary **to bear** them (**NASA**).

Ok fellow moon-stars (moonsters), assuming you made it this far? Let's shine some son-light on something I really don't see people taking into consideration when trying to figure out the calendar.

First let's admit that nobody has it figured out. Even the so-called illuminated who control the calendar worldwide are deceived—track smartly as they may.

Secondly, plug these little tidbits of puzzle pieces into your notions of knowledge and see if you don't start having revelation popcorn? I can hear people throwing things already. Just remember I am trying to help. Do you know how many times I had to go back to the drawing board to end up at this point on the starship travels? If you want to see how far one can really go, I suggest you check out my 666 Revelation flow—YHWH is amazing and science is quite devilish indeed with their 216 Magick Square & Magic 8-Ball

# ProphecyMachine.com

**ONE:** You can't make the old (original) calendar work because the Stars didn't stop when the sun and moon did. Joshua 10.13

Stars kept going. This put off things by half day.

Two words for stood still and stayed. But stars aren't mentioned.

Now there is an offset of  $.5 / 360 = .00138889$  off from stars...hmmm? Thinkle Thinkle little grasshopper!

The verse points to the sun twice. Why not moon twice and why a different word. Consider verse 12 telling sun and moon where to be. Map this. It's not that everything stopped. Stars didn't stop! Bing bing lights on?

**TWO:** Now in Isaiah 38.7 and 8 the moon and sun get separated. 2 Kings 20:9-11

Separation of moon and sun from stars and then sun and moon. All out of sync.

Pieces: Under reign...If Hezekiah King Passover 13 man 1 Kings 4:7 is that twelve-month time? Was he celebrating late on the 2<sup>nd</sup> Passover Count? Was he fostering unity between north and south kingdoms? This could be the change that comes after. Also 12 trees in revelation grow each and every month.

This could be like the whole 12 and 13 tribe thing; disciples, pillars...etc etcetera et al.

So first both great lights lose time then sun loses time!

**Three:** Now concerning the Ahaz Dial, Isaiah cries for ten degrees!

.02777778

$10/360 = .02777778$ . Note degrees not time really. Angle mangle calculations. Could be some angular momentum issues here. There is annual inequality now as there was not in the beginning. They were equal in the beginning.

This could make Jesus 12 hours comment makes sense as to what it originally used to be John 11.9

At that 716 bc time they added intercalated days or months to 13 months  
These calcs work with syndiotic

13th King | 13th month | 13th tribe | HmMMMM?

Add One change to the other change for your base differential?

.0138889 to .02777778 = .04166668

Moon short 5.63305 and sun over 5.242 off 360. Some balance here  
10.875055

**ProphecyMachine.com** 

$10.875055 / 360 = .03020849$

The alteration of momentum and speed?

No 13th month in prophecy!?

Ahaz was Solomon time so 970ish would be when 13 month comes to play every 3 or two years. Ahaz story doesn't say how long the ten degree took to return but interesting that he added 15 years to match the degrees per hour? HmMMMM?

Since Babylonia captivity no one can keep the days right? The sun moon and stars are still predictable to the T but something happened to the tracking of the Sabbath(s). Either the way is lost, hidden, or these changes explain the problem.

The feast appearance command is to appear before Yahowah 2 times, and not just about land. This hasn't happened since the ark disappeared?

2 Maccabees 2:4 Jeremiah his arc?

Paul Kept feast in Phillipi Acts 20.61?

You can't break what can't accurately keep right? And clearly there was rebellion in Israel. Maybe this is why the terminology Jews Religion and Jews Feasts are used?

Could Jesus have kept it perfect....even then so? Hmmmmm? And is this why everyone even has a hard time demonstrating the exact timeline of The Passion? Personally I believe Jesus kept it perfectly, and it's just a matter of how to piece this altogether, as The Testimony of Jesus Christ is the Spirit of Prophecy.

Jeremiah 33.20. 21.

Time has not been altered. Only that which marks it. So the counts we think we know we don't know.

However, if the days were to be calculated exactly every year the same then there would be no need for the instruction in leviticus 23.15 Why would you need to count the days?

360 days and not 52 weeks for a 364.

**FOUR:** There are 3 days of time before sun moon and stars in Genesis, so maybe people just don't know how to start the count.

# ProphecyMachine.com

Stars kept moving while two greats still and stayed. Then all kept moving while sun was turned back. The distance of turning back is the same distance moon may have continued to move forward.

10 degrees, if in real time, would have allowed noon to progress 10 degrees the other direction in which a .5 one way resulted in a .5 in another. So, convert the degrees to time, and also figure out if you are dealing with an inversion on two accounts: one is obvious and the other is dimensional of at least the 4<sup>th</sup> kind.

Let's try.  $10/360 = .02777778$  in percentage of degrees to a decimal = X amount of time.  $24/360 = .06666667$  ← ah heck. Where have I seen that before? [Please see the "666 Revelation"](#)  
 $360/24 = 15 * 2.7777778 = 41.66667$  ← here we go again ^ 666 ^

15 degrees per hour = .25 degrees per minute.

Makes me think of Mark 7.7 / Isaiah 29.13 when I hear the cries of science coming from the pulpit of the churches—mixing and mangling the scripture. But of course, the Sabbath is the Sun-Death as was it not prophesied! And the blind lead the blind into a ditch.

Luke 23.44 sun stopped shining for three hours. Temple veil torn in two!

The celestial of heaven are witnesses. Not things on earth like barley. Science doesn't even have the moon in the right context. Certainly, the Giant Impact Theory is a super lame explanation of what is a perfect light counter—indeed the things people believe. Yet I am stupid because I literally believe the moon is a light. Look up tonight my friends and tell me what you see, the sun reflecting, or the moon smiling at thee?

Zechariah 14 → Here comes the light and the Kingdom of God. I mean once you get it, well it's all over the text. So brothers and sister, follow what you can based on what is happening in Jerusalem since that's what will be practiced when Jesus returns. That is the Jerusalem of the Father and Son. Do your best to be led by the spirit and worship in spirit and truth.

[Rev 21:21-23 KJV] 21 And the **twelve** gates [were] twelve pearls; every several gate was of one pearl: and the street of the city pure gold, as transparent glass. 22 And **I saw no temple therein**: for the **Lord God Almighty and the Lamb are the temple of it**. 23 And the **city had no need of the sun, neither of the moon, to shine in it**: for the **glory of God did ILLUMINATE it**, and the **Lamb [is] the light thereof**.

So much for the so-called illuminati's allegorical mystical interpretation of the Scripture, using the black moon and satanic times to rule the world.

# ProphecyMachine.com

In short what I am trying to say is the sun moon and star worshipping **Never A Straight Answer** mystery-religionists will be illuminated by YHWH and bow to Jesus Christ in the end, and I personally can't wait—sayin'?

*We thinks science lies... as all of science comes crashing down under the weight of the moon. Freeman*
